Portugal, U.S. Sign **Base Pact** Lisbon to Get Aid Of \$145 Million

By Don Oberdorfer

LISBON - The United States and Portugal signed an agreement Tuesday for continued U.S. miliary use of the Lajes Air Base in the cortuguese Azores, which Washton officials consider one of the st useful in the world.

The agreement covering more han seven years, to February 1991, as signed for the United States by cretary of State George P. Shultz ho called the base "very valuable" nd "strategically located."

At the same time, Mr. Shultz approved agreements calling for \$60 million in U.S. grants, \$45 million in guaranteed loans for the Portuguese military and \$40 million in economic aid. U.S. officials said Washington will seek to maintain at least this level of aid throughout the life of the base pact.

The Lisbon newspaper O Dia reported the news of the aid and base pacts, along with a photo-graph of Mr. Shultz, under the banner headline, "Santa Claus is here."

Of all the military facilities abroad, a senior State Department official said recently the most valuable to the United States are Lajes in the Azores and Clark Air Force Base and Subic Bay naval facility in the Philippines.

Lajes is considered unusually important because of its location 900 miles (1,440 kilometers) offshore in the Atlantic and because the Portuguese have permitted its almost unrestricted use by the United States.

A U.S. Embassy official said Portugal, which is a member of the North Atlantic Treaty Organization, was the only ally that allowed the United States to use bases on its territory to resupply Israel during the 1973 Middle East war.

U.S. Ships Open Fire On Syrian Positions

Naval Action Follows New Attack on Jets

By Thomas L. Friedman

New York Times Service BEIRUT — U.S. ships opened fire on Syrian anti-aircraft batteries in the mountains east of Beirut on Tuesday after two U.S. F-14 fighters, reportedly on a reconnaissance mission, were shot at by Syrian surface-to-air missiles.

In a separate incident, Israeli ships shelled Yasser Arafat's guer-rilla strongholds around Tripoli during the afternoon and evening, in apparent retaliation for a midmorning time-bomb attack against an Israeli jeep patrol near Sidon that wounded three Israeli soldiers, destroyed their vehicle and damaged several nearby buildings.

Perhaps the most ominous developments of the day, however, were the bomb attacks against two Christian churches in predominantly Moslem West Beirit. In the early evening, a bomb ripped through the Mar Butros and Bulous Catholic church in West Beirut, shattering its stained-glass win-dows and blowing a large crater in the floor of its sanctuary. Minntes later, a bomb blew up near the Syriac church in the Mousseithe neighborhood a few miles away. Two persons were wounded in the first explosion, and four were hurt

The bombings marked the first time churches have been the targets of attack and appeared to be part of an escalation in religious-inspired violence here in the last month. Three weeks ago five Christian-owned shops in West Beirut were blown up in one night, while last Monday a car bomb exploded in one of West Beirnt's leading Sunni Moslem neighborhoods, kill-ing 18 persons and wounding 100.

them and forced them to fly back toward the sea." The Syrian spokesman added that "it seems that this was a pre-meditated aggression because immediately after [the overflights] two American warships west of Juich opened fire against some of

The Syrian spokesman said the and that one military vehicle was filed to Austria by hiding in a sealed turn to Romania." Mr. Liebhart damaged. He made no mention of casualties. The spokesman said that two U.S. warplanes flying over Syrian positions were "repulsed" by anti-aircraft fire.

Tuesday's naval bombardment was the second time in two weeks that the United States has hit Syrian anti-aircraft batteries in Lebanon in response to firing on their reconnaissance aircraft. On Dec. 4, 28 U.S. fighter bombers attacked Syrian anti-aircraft positions, and two U.S. planes were shot down. U.S. warships were also last in action on that day, silencing Druze gun batteries around Beirut after a clash in which eight U.S. marines were killed. .

In Tripoli, a spokesman for Yasser Arafat's guerrilla loyalists surrounded in the town by Syrianbacked dissidents, said three Israeli gunboats bombarded positions occupied by Arafat supporters in the port area of Tripoli and the Bhsas district on the southern outskirts of town at about 4 P.M and again shortly after 9 P.M. trained dog to a truck bed to sniff for explosives before the vehicle entered the U.S. Marine compound in Beirut.

Soviet Adds Missile Sites In Asia, Weinberger Says

WASHINGTON - The Soviet Union is constructing three more SS-20 launching sites in the eastern half of the Soviet Union, which would increase the number of the medium-range nuclear missiles targeted on western Asian nations by 27. the U.S. defense secretary, Caspar W. Weinberger, said Tacaday.

Mr. Weinberger did not say where the three sites were. The Russians put nine of the triple-warhead missiles at each of sites, which would give them an

additional 27 of the mobile weapger said. The missiles have a range of 3,300 miles (5,310 kilometers). without agreeing to a date for reconvening them.

According to the Pentagon, the Russians now have 243 SS-20s aimed at Western Europe from the called that action "no big deal and western part of the Soviet Union, no surprise." Another 117 are reportedly in the Far East, and the new missiles

would raise that total to 144. Last month, after the Russians walked out of the talks on intermediate-range nuclear forces, there were reports that they planned to build more SS-20s. The North Atlantic Treaty Organization is beginning deployment of 572 medi-nm-range U.S. nuclear weapons in Europe to offset the SS-20s.

■ Coolness to Build-Down' Earlier, Robert C. Toth of the Las Angeles Times reported from Wash-

The Soviet Union has shown no interest in pursuing the novel interest in two measures that are build-down" concept that was proposed by the United States, undertal war, the official said. These der congressional pressure, at the would provide prior notice of largecording to a senior U.S. official.

Under the concept in its simplest form, two old warheads would be deactivated for every new one built. In the flurry caused by the Soviet departure last week from the talks, known as START, the chilly response to build-down has gone almost unnoticed, the U.S. official said Monday, as has a more positive sign: Soviet receptiveness to some confidence-building mea-

sures, such as advance notice of missile test flights.

After the first arrivals of new U.S. medium range missiles in Europe, the Soviet delegation left the

The U.S. official, who spoke on condition he not be identified,

The official said the Soviet delegation had become "increasingly cool" to the build-down offer, saying that it discriminated against Soviet forces because the Russians have three times as many multiwarhead, land-based missiles as the United States and thus would be most affected.

By the end of the session, after 10 meetings, "they didn't give it the time of day," he said.

Congress had pressed the con-cept of build-down on the Reagan administration in exchange for support of the controversial MX

nissile program. Meanwhile, both sides showed session of the Strategic Arms Re-duction Talks that just ended, ac-bomber takeoffs, and of ballistic missile tests.

Philippines Troubled by Sex Scandals Abuse of Children Adds to Image as Carnal Marketplace

By William Branigin

Washington Post Service MANILA - If economic doldrums and the continuing political unrest were not enough. Filipinos now have something else to worry about: the growing image of their country as a sexual marketplace.

In recent days, concerns have been expressed here about the exploitation of Philippine children by an international sex syndicate based in Australia the growing flesh trade at home, "prostitution tourism" by Philippine women abroad, and allegations that sexual misconduct by cabinet ministers made British sex scandals pale by comparison.

The concerns underscore Philippine sensitivities about the country's image in the world. Recent studies have blamed uneven economic development and wide-spread poverty for a sex trade that has attracted not only Japanese group tours but foreigners who prey on

The discovery by Australian investigators of a Melbourne-based international sex syndicate called the Australian Pedophile Support Group has prompted new measures by the Philippine government to protect children reportedly victimized by the organization.

Australian police said last week that members of the group had sexual relations with Philippine boys they had sponsored through international charity groups. The scheme came to light last month when nine men

were arrested on pornography charges, Australian authorities in Melbourne said. Police seized obscene photographs of Filipino children and discovered plans to bring Filipino boys to Australia to live with men for sexual purposes. At least two of the men traveled to the Philippines to have sex with boys they were sponsoring through the charity, World Vision, Australian

The Philippine Ministry of Social Services and Development reacted last week by saying it would strictly enforce a ban on unauthorized travel by minors who are not accompanied by parents or legal guardians.

The social services minister, Sylvia Montes, also

said she would confer with representatives in Manila of World Vision and another charity with a child sponsorship program, Foster Parents Plan, about the reports that their charitable activities had been ex-

ploited for sexual purposes. A World Vision official here said he had no knowledge of any such abuse and that sponsors were always crisis marked be accompanied by a representative of the agency when ing civil unrest.

The Delights of Bringing Up the Rear

By Charles Hillinger Los Angeles Times Service

¬ ACTUS. California — The Southern Pacific freight train rattled across the lonely stretch of sand and mesquite on its 198-mile run between Yuma, Arizona, and Colton, California. Conductor Bill (Arky) Hughen, 60, stood on the caboose platform inhaling a few quick gulps of fresh air, then ducked back inside to his observation seat at the left bay window. "Seems like I've spent half my life ridin' these damn things," said the 5-foot, I1-inch, 220-pound curly-haired conductor, a native of Smackover, Arkansas. (He said his hometown got its name when drillers hit pay dirt and yelled: "We're smack over a pool of oil.")

Hughen hired on with Southern Pacific after being in the Navy as a bos'n's mate aboard a destroyer in the South Pacific from 1942 to 1946. Now he ranks 12th on the railroad's seniority list and is among a slowly vanishing species — a conductor in a Bazoo Wagon, as railroaders affectionately call the caboose.

Railroad executives recently announced that at least a fourth of the 14,000 cabooses in the United States will be phased out during the next five years as trackside computerized scanners change the role of the conductor.

The caboose conductor sits in his observation seat scanning the cars ahead - and passing trains - for fires, brake malfunctions and other problems. Increasingly, however, the scanners along-the tracks are providing much of the same information with a system of flashing lights and digital readouts. In time, railroad officials say, the conductors will be moved into a seat in the locomotive, where they can check the scanners, and cabooses will be unneces-sary. "Not in my time," Hughen insisted. "I'll be long gone before the caboose. I don't know bow railroadin' is gonna work without the tail car. Everythin' will have to change."

He has been on the same run for all of his 37 years with the Southern Pacific. Io California it goes up the Beaumont Grade past Thousand Palms, Indio and the Salton Sea and through the wild. wide-opeo Imperial County desert to Arizons and then back to Col-ton. "It's damn hot workin' the desert most of the year, but hell, I ain't complainin'. If I didn't like it I would have transferred long ago. I know every inch of the way. When it rains there's nothin' prettier than the cactus bloomin'. The sunups and sunsets can't be beat. At night you see everythin' in the sky, millions of stars, a mooo you can almost reach out and touch, shootin' stars and satellites streakin' across the beavens."

Hughen regards the conductor as bead hoocho of the train, but he concedes that the "hoghead [engineer] up front may disagree. But the truth is the conductor has the beans to prove it. I'm responsible for movin' the train, for its safety. I make sure all operatin' prders are followed. I do all the paperwork, keep the records, start and stop the train whenever oecessary."

He backstops the engineer on the train's speed by checking his wa'cb as mile posts go by. "Hoghead has a speedometer in the cab, but speedometers can go haywire. So I make sure the speed is on the mark," he explained. On this trip the medium-length freight travels at 60 m.p.h. by Cactus, Clyde, Glamis, Acolita, Amos and

Regina — railroad names for remote locations in the desert.

Uotil the 1950s the caboose was Hughen's home away from bome. It was where he slept, ate his meals and worked - a car illnminated by kerosene lamp and heated by pot-bellied coal stove, Now the caboose is in tune with the times, electrified and comfort-

Hughen's desert run takes him 6 to 15 hours from Colton to Yuma, where be lays over 12 to 14 hours, sleeping in a company motel in the railroad yards. Then it is another 6 to 15 bours on the train back bome. He's generally away 35 to 45 hours oo the round-trip run. "I like it a belluva lot," he said, "but I never done oothin' else since I was a swabbie so, I ain't got oothin' to compare it

Bill (Arky) Hughen mans his Bazoo Wagon.

PARIS AREA FURNISHED

STAYING IN PARIS?

LONDON POSTCARD Once Upon a Time . .

By Michael Zwerin

International Herald Tribune. ONDON - Once upon a time → Alain Boublil had a visit from his muse while trying to park near the Champs-Elysées.

He had written the book and lyrics for two epic musicals, "La Révolution Française," the first French rock opera, and "Les Miserables," based on Victor Hugo's historical novel and produced by Robert Hossein, and now he was thinking of another based on songs hy the Swedish pop group Abba, which he has represented in France since 1974, when they won the Eurovision Song Contest. But it was nothing more than a raw idea; no theme, no name.

Circling around, he said to himself: "I need something magic. Magic. Abba. Abbacadabra." Eureka! It wonld be a fairy tale.

And it is about to come true. Billed as "a modern fairy tale . . . a hrand new musical, ideal for all the family," "Abbacadabra" opens at the Lync, Hammersmith theater in London Monday night. It is per-haps the first musical show based on English songs by Swedish composers with texts totally rewritten in French in Paris and produced in English in England. For years he had been saying to

Biorn Ulvaeus and Benny Andersson, Abba's composers, that their songs were musical comedy material. It meant more than a mere adaptation, however; he wanted to take already popular songs, many of which had sold millions of records, and change the lyrics from some-thing like "Goodbye my love ..." to "I am always beautiful even if I' sleep a hundred years," and "Mon-ey. Money" to "Mon nez, mon nez," sung by Pinocchio.

Waiving rights and resolving general legal problems between an international array of publishers took more than one wave of Boublil's magic wand. But he does business with people like himself, "croative people who have also built small, family-style, publishing and production outfits [Abba's Stig An-dersson and the British producer Mickey Most, for example and who understand each other." Presto! Contracts were signed.

"That only left the creative prob-lem," smiled Boublil, 37, a debonair Parisian who speaks graduate-

level Franglais: "I was writing a song for Johnny Hallyday at the time I ran into Daniel Boublil, who had written many hit songs for Catherine Lara, on the street. We have the same family name but we're not related, not even distant cousins. We'd met hut did not really know each other. I said to him 'Let's finish this song together. It's too funny, it's ridiculous. We have the same name, we should work together." The song "Veau d'or, a Vaudou," became a Hallyday hit.

Ahbacadabra project around. We decided that fairy-tale books are prisons in which the Wickel William prisons in which the Wicked Witch locks up these characters children drop a book taking it out of a bookcase. When it falls the characters are freed. They materialize in front of the childrens eyes. The Wicked Witch put them in the book during Sleeping Beauty's wedding 100 years ago, and once they are freed they go back into the forest to return to the wedding.

"But the Wicked Witch has been keeping up with the times and she has become a video pirate queen who locks her victims in video cassettes rather than books. Children understand video technology and they help the characters escape her diabolical camera in the forest, When the children wake up they are not sure whether or not it stall been a dream.

"We made a record in French called 'Abbacadabra' for WEA. which was released last summer. but we didn't know where it was going to take us. Cameron McIntosh, who produced 'Cats' in London, came to visit me in Paris to talk about an English production of 'Les Misérables.' He saw the record on my desk and asked 'What's this?' I explained, and he said 'I like It. Let's test it for Christmas in London.' Just like that I never even had the time to look for a French producer. I thought he was kidding. He was serious.

Abbacadabra stars Elaine Paige as the Wicked Witch and Finola Hughes as Cinderella. Both were in the original production of "Cats."

David Wood wrote the English book based on the concept of Alzin and Daniel Bouhlil. The theater is... booked through Jan. 21. "We did it," Alain smiled, "as you say, the other way around." Abbacadabra! Presto! Eureka!!

International Herold Tribune

Mary Renault, 78, Dies; Wrote Historical Novels

The Associated Press LONDON - Mary Renault, 78, who brought the history and leg-ends of ancient Greece to life in her novels, died Tuesday in South Africa, her publishers announced in

Curbs Brown Ltd. announced that Miss Renault died after a short" illness in a hospital in Cape Town, where she made her home after leaving Britain in the 1940s.

Among her best known books are "The Last of the Wine," "The King Must Die." "The Bull from Sea" and "The Mask of Apollo." Her most recent book, the "Fu-neral Games," of 1981, completed her trilogy on the breakup of the empire of Alexander the Great that started with "Fire From Heaven", in 1970 and "The Persian Boy" in

Born Mary Challans in London, the daughter of a doctor, she became a nurse after first attending Oxford University with the idea of

China's Grain Crop Is Record

Umical Press Interne BELING — China's grain output this year was a record 370 million metric tons despite the worst damage by wind and hall storms since the founding of Communist China in 1949, a Ministry of Agri-

- 77

becoming a teacher. She later took the pen name of Mary Renault. Three of her early novels were written while she was off duty from nursing service during World War

After the war, she traveled through Africa and more extensively in Greece, where she developed the scholarship that went into her

Her publishers eulogized Miss manli for her scholarship but added that "her huge readership is due to her evocative re-creation of those who lived" ancient Greek his-

Several of her books grew from Greek legend, including "The Bull from the Sea," which recounts a tale of Thesens, king of Athens, who slew the Minotaur. "The King Must Die" also is constructed from egend about Theseus, who defied fate and was able to claim the throne of Athens.

In 1971, she won the Silver Pen ward for her 1970 novel "Fire From Heaven."

Miss Renault was a fellow of the Royal Society of Literature and an honorary fellow of St. Hugh's College, Oxford.

Harold S. Black, 85, who in 1981 entered the National Inventors Hall of Fame at the Patent and Trademark Office in Arlington, culture spokesman said Tuesday. U.S. Negotiating to Purchase Ranch In California as Habitat for Condors

Los Angeles Times Service

LOS ANGELES - lo one of the largest acquisitions ever planned to save an endangered species, the federal government is negotiating for the purchase of all or part of a 13.000-acre ranch that serves as a crucial feeding ground for the California cooder,

The ranch, located oear the town of Maricopa in southern Kern

County, currently is being studied by a team of biologists and land appraisers from the U.S. Fish and Wildlife Service. This fall, Congress appropriated S5 million for acquisition of the property, known as the Hudson ranch, and other lands critical to the condor's survival.

Purchase of the property became vital, condor specialists said, after the current owners announced plans to develop the ranch with up to 700 housing units known as "ranchettes."

"In the late summer and fall virtually the entire wild population of condors uses the ranch for feeding," said John Ogden, co-director of the Condor Research Center in Ventura. "We simply couldn't afford to lose an area as valuable as this one."

Condors, which range over much of southern California, have been slowly losing ground to civilization for many decades. Only about 20

of the huge vultures are believed to remain in the wild.

The proposed land acquisition is the first move the government has made to expand protected habital used by the condors since the 55,000-acre Sespe condor sanctuary was established 30 years ago.

MAHARISHI TECHNOLOGY OF

His Holiness Maharishi Mahesh Yogi Founder of the Maharishi Technology of the Unified Fould (1983). Founder of the Science of Creative, Intelligence (1971), Founder of Mataishi International University (1971), and Founder of the World Covernment of the Age of Enfightenment (1976).

"It is fulfilling to proclaim that with the discovery of the unified field of all the laws of nature and the development of the technology of the unified field, and with the authority that every government enjoys in its country, there is nothing that cannot be accomplished by a sovereign government. Now not only can every government rise above the reach of problems but also it can attain any desired height of achievement." — Maharishi

THE UNIFIED FIELD

The unified field is described by the supergravity theory of quantum physics as a super-symmetric (perfectly balanced), non-Abelian (self-interacting) field of pure intelligence, which generates the fundamental particles and forces of nature through its infinitely self-referral dynamics at the Planck scale of nature's functioning 110-33 cm. or 10-43 sec.), giving rise to the infinite diversity of the universe.

MODERN SCIENCE VEDIC SCIENCE

The discovery of the unified field as. a self-referral reality through the objective approach of modern science, the experience of this self-referral reality as the simplest state of buman awareness-transcend intal consciousness-gained through the subjective approach of ancient Vedic Science as recently brought to light by Maharishi, and the benefits of this experience verified through a large body of scientific research have given rise to the Maharishi Technology of the Unified Field, which trains the individual to function from the self-referral level of . nature's functioning so that nature's perfect balance, supreme efficiency, infinite organizing power, and unlimited creativity are available in daily life.

UTOPIA

The Maharishi Technology of the Unified Field has placed mankind on the doorstep of utopia—the unified field based civilization. Trends and tendencies in society will be maintained in the evolutionary direction, bringing fulfillment to all areas of governmental responsibility, including administration, education, defense, health, rehabilitation, economics, and agriculture.

CREATING IDEAL CIVILIZATION ON EARTH A TASTE OF UTOPIA—DEC. 17-JAN. 6, 1984

SOLVING PROBLEMS OF GOVERNMENTS

The World Government of the Age of Enlightenment offered last month to solve the problems of all governments.

In the same wave of inspiration, Maharishi International University has now planned to give a sample taste of utopia to all mankind.

Seven thousand experts in the Maharishi Technology of the Unified Field will assemble at MIU from December 17 to January 6 to collectively create a strong influence of coherence and positivity in the whole world.

This unique demonstration of global coherence, originating from one place and reaching all parts of the world, will inspire governments to follow this example in their own countries and create a group of experts in the Maharishi Technology of the Unified Field so that negative trends do not arise in the country, law and order are spontaneously maintained, and administration becomes simple, effective, free from problems, and free from the elements of fear and punishment. Real freedom will be enjoyed by the people and by the government.

Government

ADMINISTRATION The Maharishi Technology of the Unified Field applied to administration offers to every government that supreme efficiency with which nature governs the universe, without altering the present system of government in any way.

This beautiful approach of bringing national law into alliance with natural law strengthens the government and improves the destiny of the nation in such a balanced and natural way that the creation of an ideal society can be a reality for any sovereign nation within as short a time as is desired.

In his Absolute Theory of Government, Maharishi explains that every government, irrespective of its system, is an innocent mirror of its nation. The strength and success of the government depends upon the strength and integrity of national consciousness. Since the government draws its inspiration and vitality from the collective consciousness of the people, it is essential that the government does whatever it can to maintain the highest quality of national consciousness.

All trends and tendencies in the country are fundamentally governed by the laws of nature. The unified field, being the fountainhead of all the laws of nature, underlies all aspects of national life and as such is available everywhere. Furthermore, the means of enlivening the unified field in national consciousness is also available everywhere, in the brain physiology of each individual in every country. Thus, every government already bas in its population everything that it could ever need to make life fulfilling and the nation ideal. It is just a matter of knowing how to use the nation's most precious resource-the brain physiology of every citizen.

"Human brain physiology is that hardware of the cosmic computer which, through proper programming, can draw upon the cosmic software of nature to accomplish anything."

--- Maharishi What is fortunate is that only the square root of one percent of the Technology of the population of the country (a slightly larger proportion for a country with a small population) practicing the Maharishi Technology of the Unified Field in any one place in the country is sufficient to fully awaken national

consciousness. What is still more fortunate is that any group, regardless of education or economic status, can be trained to create this desired effect. What is most fortunate is that MIU is prepared to train such groups at its campuses in lowa and in Washington, D.C., or in any country at the invitation of its government, universities, public or private organizations, or any one well-wisher of the nation.

Governments have always enjoyed their parental role of bringing maximum happiness to their people. The benefits that the Maharishi Technology of the Unified Field brings to all fields of life are so extensively documented by scientific research that any head of state can adopt, without reservation, this practical knowledge of the unified field to fulfill his aspiration to do maximum for his people and the world.

Now the knowledge of the unified field and the availability of the technology of the unified field make it mandatory for every government to base its administration on the infinite organizing power of the unified field of natural law.

Education UNFOLDING CREATIVE GENIUS

The Maharishi Unified Field Based Integrated System of Education offers a new approach to teaching whereby every lesson is taught with reference to

taneously. The numerous benefits of this integrated system of education have been verified through a large body of scien-Elic research and are further demonstrated in the nigh quality of life of MIU students and their natural focus on academic study, from primary level to Ph.D.

this unified field based approach which raises life to be lived in full accord with natural law, can be easily introduced to fulfill the goals of any system of education without the need to revise the existing curriculum. Educators from all countries are invited for training in this ideal system of education.

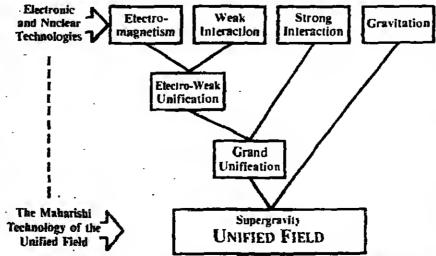

Defense

VICTORY BEFORE WAR

Maharishi's contribution in the field of defense is invincibility for every nation. The Maharishi Technology of the Unified Field offers absolute defense in that it eliminates the very need for defending by preventing the birth of an enemy. This approach promotes life in accordance with natural law, maintains evolutionary trends within the country, and radiates tife-supporong influences in all directions, automatically preventing the birth of an enemy.

The need for defense has its basis in fear, which is caused by stress. Since education does not train the people to think and act spontaneously in accordance with the full potential of natural law, the whole population is violating the laws of nature, causing stress, fear, and weakness, and creating the need for defense.

Discovery of the Unified Field Unification of the Four Fundamental Forces of Nature

As the figure shows, the unified field is basic to all other levels of natural law, including the electronic and nuclear levels. Therefore, identification with the unified field brings the advantage of the infinite creativity and organizing power of all the laws of nature to any individual and any nation.

Destructive means of defense can at best leave the enemy in a state of fear, which can serve only to postpone confrontation. History records that destructive means of defense have always proven suicidal for any nation. Fortugately, those days are now coming to an end.

The predominant sense of restraint observed in the family of nations today with regard to the use of nuclear arms demonstrates the growth of the most fortunate, tender quality of life-the desire of the leaders of the world to ensure security without destroying life. This noble search of world leadership finds its fulfillment in the Maharishi Technology of the Unified Field, which offers absolute defense by bringing nourishment to life.

This unified field based approach has raised defense from the ground of ignorance and cruelty to the heights of wisdom and compassion. Nourishing the hearts of all nations, every nation will enjoy invincibility. Victory before war is the clarion call of unified field based defense.

Health

REVERSAL OF AGING

Maharishi's unified field based approach to health simultaneously promotes the health of the individual and the collective health of the nation by bringing life into accordance with the full potential of natural law.

This approach produces perfect integration of mind, body, and behavior and eliminates imbalance, leaving no chance for weakness to remain on any level of life-individual, national, or international.

Immortality, being a quality of the unified field, is enlivened on every level of life through this unified field based approach to health. This brings perfect health and longevity to the individual and the nation. Perfect health is marked by the ability to use the full creative potential of life in the state of fulfillment.

Extensive scientific research indicates improvements in all areas of health, including reversal of the aging process, through the Maharishi Technology of the Unified Field (Ref.: Scientific research papers in four volumes, 2800 pages).

Rehabilitation RESTORING BALANCE

gram has announced that its bro-

chure entitled "Absentee Voting"

How to Do It will soon be distrib-

uted overseas.

The guide will be available at

Copies of the guide (DoD FS-13)

Director, Federal Voting Assis-

The Maharishi Unified Field Based Integrated System of Rehabilitation eliminates stress and restores balance in the individual and his environment. It eliminates negativity in life, promotes evolutionary tendencies, and offers the perfect means of rehabilitation by naturally raising life to be lived in accordance with all the laws of nature.

This ideal approach to crime prevention and rehabilitation has been validated by extensive scientific research, including studies in prisons showing improved mental and physical health, reduced negativity and hostility, and reduced recidivism. It has also been used in probationary sentencing as a positive alternative to incar-

Now it is within the reach of every government to empty its prisons and uphold life in its full dignity.

Economics

FULFILLING PROSPERITY

The contribution of the Maharishi Unified Field Based Integrated System of Economics is unlimited for the simple reason that ereativity, the basis of all prosperity and progress, is fully lively in the unified field. When the unified field is enlivened in national consciousness, infinite creativity is lively in the national economy, business and industry are free from problems, and prosperity is crowned with fulfillment.

Agriculture

SELF-SUFFICIENCY Maharishi's unified field based

approach to agriculture creates perfect balance in nature. All the laws of nature rise to support the soil, the seed. the weather, and the farmer. Seasons come on time. Crops are abundant. National self-sufficiency is the harvest of unified field based agriculture.

UNIFIED FIELD BASED LEADERSHIP TRAINING

Beginning on January 12, 1984, unified field based leadership training courses will be offered in Washington, D.C. Weekend and week-long conferences will be available for the top level of leadership in all major areas of society. Other courses of varying duration will be held for administrators and future

Qualities of the Unified Field

Since the unified field is a field of all possibilities, the qualities of the unified field are innumerable. A few of its characteristic qualities are described here in the light of the supergravity theory of quantum physics in order to give a glimpse of the benefits that the technology of the unified field can bring to individual and collective life:

1. Perfect Balance—supersymmetry: balance of bose and fermi fields. 2. Invincibility—though the physical particle states appear broken, the Lagrangian of the unified field remains eternally supersymmetric-the laws governing the unified field are inviolable. 3. Self-referral—the non-Abelian property of self-interaction. 4. Self-sufficiency—a unified gauge field. containing the whole of physics, interacts with itself alone. 5. Infinite Creativity—the fountainhead of natural law: from this unified source. sequential dynamical symmetry breaking gives rise to all the particles and forces of nature. 6. Infinite Dynamism-the quantum fluctuations at the Planck scale express infinite dynamism. 7. Infinite Organizing Power-the Hamiltonian of the unified field governs the time evolution of the entire universe. 8. All Possibilities—all the fundamental quantum fields are fully enlivened as dynamical degrees of freedom at the Planck scale of superunification. 9. Immortality—time translational invariance of the Lagrangian density of the unified field. 10. Nourishing—the eternal continuum of self-interaction of the unified field sustains the time evolution of the universe.

All beautiful, evolutionary qualities spontaneously blossom in individual and collective life as the mind gains increasing familiarity with the unified field. This has been amply verified by extensive scientific research in the areas of physiology, psychology, sociology, and ecology and demonstrated in the lives of millions of people and in the improving quality of national life on all continents during the past 25 years. These achievements are at the basis of our global initiative to give a sweet taste of utopia to all mankind and to invite our family of nations to collectively create unified field based ideal civilization in our generation.

The sweet taste of utopia comes as the supreme gift of the Silver Jubilee Celebrations of Maharishi's worldwide Transcendental Meditation movement, 1958 to 1983. Maharishi declared 1983 to be the "Year of the Unified Field" Now, 1984 will be welcomed as the "Year of Unified Field Based Civilization." INSTITUTE OF WORLD LEADERSHIP, MAHARISHI INTERNATIONAL UNIVERSITY, FAIRFIELD, IOWA 52556, USA

'Human Bombs' Feared by U.S. As New Form of Mideast Terror

By Michael Getler and Rick Atkinson Washington Post Service

WASHINGTON - Following suicide car and truck bombings by Islamic terrorists at U.S. facilities in Lebanon and Kuwait. American and allied officials say "buman bombs" -- people with explosives strapped to them - may be the next form of kamikaze-style actions in the Middle East.

Although terrorism has been a problem for many years in the Middle East, the relatively recent phenomenon of using fanatics seeking martyrdom in suicide attacks has opened what Reagan administration officials call "a whole new Beirut in October and on an Israeli spectrum of violence" and new op- military headquarters in Tyre in tions for attack for which there are November were suicide missions, few countermeasures at the mo- and allied intelligence officials be-

eas controlled by Syrian forces.

Monday's attacks in Kuwait against U.S., French and Kuwaiti facilities were claimed by the same Islamic group that took responsibility for the suicide attacks in Lebanon, but U.S. intelligence officials believe the latest bombings may have involved radical Shiites from Kuwait. While the government can take

some measures to improve security beyond those put into effect after the embassy in Tehran was seized in 1979, the department's deputy press spokesman, Alan Romberg, said that embassies, which must carry on considerable public business, cannot be turned into "armed

President Ronald Reagan said ast week that perbaps as many as 1,000 terrorists, many of them said to be Iranian, had been trained in Lebanon for possible use as suicide attackers.

A senior administration official said he did not know the exact number, but that it was "substanial" and that these terrorists certainly bad targets within Lebanon. Whether they are beaded anywhere else, he said, "we can't be sure." He indicated that they appeared to be under some kind of political control from Iran. Another official said a decision

had been made by the Khomeini regime in make suicide missions a part of the revolutionary arsenal and that it was clear these forces had been trained in Iran and Lebanon although it was not clear bow many were Iranians and bow many were radical Shiites from Lebanon.

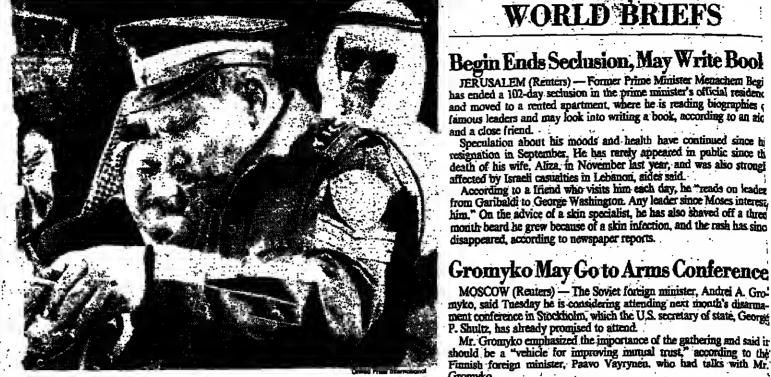

the titles in the cabinet, but this can ister, met with General Evren at the be done only by an existing cabi-This official also said there was net. His new cabinet is expected to evidence that these attackers were approve a restructuring immediateselecting targets for further raids in ly, including ministers of state who are expected to work closely with appointed prime minister shortly Mr. Ozal as a kind of "inner cabibuman bombs."

Martin Arosteguy, employed by Risks International, a security con-sulting firm, said the new suicidal techniques may be especially dev-astating and hard to counter because terrorists may be using a new explosive called hexogen, which is more powerful than TNT but takes less space and is easier to conceal. Some in Beirut believe this was used in the U.S. Marine barracks

Specialists throughout the U.S. government said they believe there is a strong Iranian connection to the terrorist actions, both in terms of encouraging some of it and of financing. But they added that others are the second anniversary of marked the second anniversary of the second anniver er countries -especially Syria, but martial law imposed in 1981. The also Libya - and groups such as the Palestinians are involved in such terrorism, with frequently differing motives.

Government specialists said they believe the attacks in Kuwait on Monday by Shiites with ties to Iran prohably tellect several motives: ng-standing hatred of the United States by the Khomeini regime for previous U.S. support of the shah of Iran, antagonism toward France and Kuwait for supporting Iraq in the Gulf war, and retribution for recent French retaliation against terrorist bases in Lebanon.

Iran also has a clear interest in thwarting Western efforts to prevent a takeover by radical factions in Lebanon, But some officials said the suicide-bomb attacks may be part of a campaign of psychological war. rather than an established plan, being waged by Tehran and Damascus to rid Lebanon of Western influence hy creating a feeling of belplessness and frustration in Western public opinion.

A Kuwaiti policeman removes a truck indicator lamp that stuck in the gate when the bombladen truck crashed into the U.S. Embassy compound on Monday, wrecking a building.

Warsaw Arrests Pro-Solidarity Priest, EC Agricultural Ministers Fail to Agree Releases Him After Church Intercedes

Rev. Jerzy Popieluszko

of an effort to deter protests this

WARSAW - A Roman Catholic priest detained when police al-legedly found illegal materials in his Warsaw apartment was freed Tuesday after church officials interceded with the Communist au-

thorities, PAP news agency said.

The report said judicial investigations into the Rev. Jerzy Popieluszko would continue.

The authorities refused to diselose what was allegedly found at the apartment but a government spokesman, Jerzy Urban, said the Lebanon, "not merely with truck materials included "things which and car bombs but possibly with priests do not and should not porpriests do not and should not normally have." Father Popieluszko was detained

Monday after answering a summons by the Warsaw prosecutor for questioning in connection with allegations that he had abused religious freedom in sermons attacking communism. He could have been held for up to 48 bours without charge, but PAP said be was released "as a result of the intercession of representatives of the

The detention of Father Popie-luszko, who has supported the Solidarity free trade union from his government used the occasion to renew its denunciation of the Peace Prize as "a clearly anti-Communist" gesture.

BRUSSELS (Reuters). — The agricultural ministers of the European Community ended a two-day meeting Tuesday without agreement on the

Community ended a two-day meeting Tuesday without agreement on the farm budget crisis, diplomats said.

Agriculture Commissioner Poul Dalsager warned the ministers that finances will be extremely tight next year, but officials stressed concrete proposals on making cods meet would have to await the vote on the budget by the European Parliament on Thursday.

The Parliament's budget committee is trying to put pressure on governments to make progress on new policies and an overhaul of budgetary contributions which came nowhere near agreement during a meeting of community leaders in Athens last week.

meeting of community leaders in Athens last week.

Spanish Communists to Open Congress

MADRID (Reuters) — Spain's crippled Communist Party begins a national congress Wednesday with two rival factions vying for power and each threatening a walkout if the other side triumphs.

The struggle between supporters of the secretary-general, Gerardo Iglesias, 38, and a former leader, Santiago Carrillo, 68, could turn the five-day, 11th congress here into the most divisive in the party's 63-year history.

The situation has been aggravated by a slump in membership and the electoral rout last year that left the Communists with just four of the 350

seats in parliament. At stake is the future of the party and possibly also of Eurocommunism, the doctrine of independence from Moscow:

Artists' Protest Closes Dutch Museums

AMSTERDAM (AP) — Dutch museums have been closed to the public since artists occupied two of them last week in protest over government plans to cut their subsidies. Museum authorities are engaged in a standoff with the artists, who are

occupying the Rijksmuseum and Amsterdam's museum of modern art. The museums are unwilling to risk damage to their art treasures by having the demonstrators forcibly removed, and the artists themselves say they plan to stay until they get concessions. At issue is the government plan to cut its artist assistance program from 130 million guilders (about \$42 million) this year to 50 million guilders next year.

For the Record

Simone Rozès, 63, has been appointed to preside over the Cour de lassation, France's highest court of appeal. She will be the first woman to hold the post. She has been serving as attorney general at the European Court of Justice in Luxembourg since 1981. (Renters)

Two murderers are to be executed in the electric chair on Wednesday and Thursday in Georgia. The first, Alpha Ous Stephens, 38, is waiting for a last-minute appeal to the 11th U.S. Circuit Court of Appeal in Atlanta. The Georgia Board of Pardons rejected a petition Tuesday for a stay by the second, John Eldon Smith, 53. Both men have had their

LOS ANGELES — In one of the largest acquisinous ever planned to save an endangered species, the federal government is negotiating for the purchase of all or part of a 13,000-acre ranch that serves as a crucial feeding ground for the California condor.

The ranch because was the town of Marroons in courtbarn Kern

The ranch, located near the town of Maricopa in southern Kern County, currently is being studied by a team of biologists and land appraisers from the U.S. Fish and Wildlife Service. This fall, Congress appropriated \$5 million for acquisition of the property, known as the Hudson ranch, and other lands critical to the condor's survival.

Purchase of the property became vital, condor specialists said, after the current owners announced plans to develop the ranch with up to 700 housing units known as "ranchettes."

In the late summer and fall virtually the entire wild population of condors uses the ranch for feeding," said John Ogden, co-director of the Condor Research Center in Ventura. "We simply couldn't afford to lose an area as valuable as this one.

Condors, which range over much of southern California, have been slowly losing ground to civilization for many decades. Only about 20

of the huge vultures are believed to remain in the wild.

The proposed land acquisition is the first move the government has made to expand protected habitat used by the condors since the 55,000-acre Sespe condor sanctuary was established 30 years ago.

neering honors.

A TASTE OF UTOPIA—DEC. 17-JAN. 6, 1984

The World Government of the Age of Enlightenment offered last month to solve the problems of all governments.

In the same wave of inspiration, Maharishi International University has now planned to give a sample taste of utopia to all mankind.

Seven thousand experts in the Maharishi Technology of the Unified Field will assemble at MIU from December 17 to January 6 to collectively create a strong influence of coherence and positivity in the whole world.

This unique demonstration of global coherence, originating from one place and reaching all parts of the world, will inspire governments to follow this example in their own countries and create a group of experts in the Maharishi Technology of the Unified Field so that negative trends do not arise in the country, law and order are spontaneously maintained, and administration becomes simple, effective, free from problems, and free from the elements of fear and punishment. Real freedom will be enjoyed by the people and by the government.

The Maharishi Technology of the Unified Field applied to administration offers to every government that supreme efficiency with which nature governs the universe, without altering the present system of government in any way.

This beautiful approach of bringing national law into alliance with natural law strengthens the government and improves the destiny of the nation in such a balanced and natural way that the creation of an ideal society can be a reality for any sovereign nation within as short a time as is desired.

In his Absolute Theory of Government, Maharishi explains that every government, irrespective of its system, is an innocent mirror of its nation. The strength and success of the government depends upon the strength and integrity of national consciousness. Since the government draws its inspiration and vitality from the collective consciousness of the people, it is essential that the government does whatever it can to maintain the highest quality of national consciousness.

All trends and tendencies in the country are fundamentally governed by the laws of nature. The unified field, heing the fountainhead of all the laws of nature, underlies all aspects of national life and as such is available everywhere. Furthermore, the means of enlivening the unified field in national consciousness is also available everywhere, in the hrain physiology of each individual in every country. Thus, every government already has in its population everything that it could ever need to make life fulfilling and the nation ideal. It is just a matter of knowing how to use the nation's most precious resource-the brain physiology of every citizen.

"Human brain physiology is that hardware of the cosmic computer which, through proper programming. can draw upon the cosmic software of nature to accomplish anything."

-Maharishi What is fortunate is that only the square root of one percent of the population of the country (a slightly larger proportion for a country with a small population) practicing the Maharishi Technology of the Unified Field in any one place in the country is sufficient to fully awaken national

consciousness. What is still more fortunate is that any group, regardless of education or economic status, can be trained to create this desired effect. What is most fortunate is that MIU is prepared to train such groups at its campuses in lowa and in Washington, D.C., or in any country at the invitation of its government, universities, public or private organizations, or any one well-wisher of the nation.

Governments have always enjoyed their parental role of bringing maximum happiness to their people. The benefits that the Maharishi Technology of the Unified Field brings to all fields of life are so extensively documented by scientific research that any head of state can adopt, without reservation, this practical knowledge of the unified field to fulfill his aspiration to do maximum for his people and the world.

field and the availability of the technology of the unified field make it mandatory for every government to base its administration on the infinite organizing power of the unified field of natural law.

Education UNFOLDING CREATIVE GENIUS

Integrated System of Education offers a new approach to teaching wherehy every lesson is taught with reference to

Unified Field

individual and any nation.

Technology of the

and Nuclear

Now the knowledge of the unified

The Maharishi Unified Field Based

the knowledge of the whole discipline and the source of all disciplines is shown to be the field of pure intelligence, which the student experiences in the simplest state of his own awareness, transcendental consciousness.

The student grows in the awareness that all branches of knowledge are different modes of his own intelligence. His creative genius blossoms as his awareness is identified more and more fully with pure intelligence, the unified field of all the laws of nature. Instinctively, his thoughts are right; he does not make mistakes; his behavior is spontaneously evolutionary. He grows in ideal citizenship—the ability to fulfill his own interests and promote the interests of the whole society simultaneously.

The numerous benefits of this integrated system of education have been verified through a large body of scientific research and are further demonstrated in the high quality of life of MIU students and their natural focus on academic study, from primary level to Ph.D.

This unified field based approach, which raises life to be lived in ful accord with natural law, can be easily introduced to fulfill the goals of any system of education without the need to revise the existing curriculum. Educators from all countries are invited for training in this ideal system of education.

Defense VICTORY BEFORE WAR

Maharishi's contribation in the field of defense is invincibility for every nation. The Maharishi Technology of the Unified Field offers absolute defense in that it eliminates the very need for defending by preventing the hirth of an enemy. This approach promotes life in accordance with natural law, maintains evolutionary trends within the country, and radiates life-supporting influences in all directions, automatically preventing the birth of an enemy.

The need for defense has its basis in fear, which is caused by stress. Since education does not train the people to think and act spontaneously in accordance with the full potential of natural law, the whole population is violating the laws of nature, causing stress, fear, and weakness, and creating the need for defense.

Interaction

Gravitation

Destructive means of defense can at best leave the enemy in a state of fear, which can serve only to postpone confrontation. History records that destructive means of defense have always proven suicidal for any nation. Fortunately, those days are now coming to an end.

The predominant sense of restraint observed in the family of nations today with regard to the use of nuclear arms demonstrates the growth of the most fortunate, tender quality of life-tbe desire of the leaders of the world to ensure security without destroying life. This noble search of world leadership finds its fulfillment in the Maharishi Technology of the Unified Field, which offers absolute defense by bringing nourishment to life.

This unified field based approach has raised defense from the ground of ignorance and cruelty to the heights of wisdom and compassion. Nourishing the hearts of all nations, every nation will enjoy invincibility. Victory before war is the clarion call of unified field based defense.

Health

REVERSAL OF AGING

Maharishi's unified field hased approach to health simultaneously promotes the health of the individual and the collective bealth of the nation by bringing life into accordance with the full potential of natural law.

This approach produces perfect integration of mind, body, and behavior and eliminates imbalance, leaving no chance for weakness to remain on any level of life-individual, national, or international.

Immortality, being a quality of the unified field, is enlivened on every level of life through this unified field based approach to health. This brings perfect health and longevity to the individual and the nation. Perfect health is marked by the ability to use the full creative potential of life in the state of fulfiliment.

Extensive scientific research indicates improvements in all areas of health, including reversal of the aging process, through the Maharishi Technology of the Unified Field (Ref.: Scientific research papers in four volumes, 2800

Rehabilitation RESTORING BALANCE

How to Do It" will soon be distrib

The guide will be available at U.S. embassies, airline companies

and other organizations serving

Americans abroad. Military per-

sonnel can obtain copies where

The Maharishi Unified Field Based Integrated System of Rehabilitation eliminates stress and restores halance in the individual and his environment. It eliminates negativity in life, promotes evolutionary tendencies, and offers the perfect means of rebabilitation by naturally raising life to be lived in

accordance with all the laws of nature. . This ideal approach to crime prevention and rebabilitation has been validated by extensive scientific research, including studies in prisons showing improved mental and physical health, reduced negativity and hostility, and reduced recidivism. It has also been used in probationary sentencing as a positive alternative to incarteration.

Now it is within the reach of every government to empty its prisons and uphold life in its full dignity.

Economics

FULFILLING PROSPERITY

The contribution of the Maharishi Unified Field Based Integrated System of Economics is unlimited for the simple reason that creativity, the basis of all prosperity and progress, is fully lively in the unified field. When the unified field is enlivened in national consciousness, infinite creativity is lively in the national economy, business and industry are free from problems, and prosperity is crowned with fulfillment.

Agriculture

SELF-SUFFICIENCY Maharishi's unified field based approach to agriculture creates perfect salance in nature. All the laws of nature rise to support the soil, the seed. the weather, and the farmer. Seasons come on time. Crops are ahundant. National self-sufficiency is the harvest of unified field based agriculture.

UNIFIED FIELD BASED

LEADERSHIP TRAINING Beginning on January 12, 1984, unified field based leadersbip training courses will be offered in Washington, D.C. Weekend and week-long conferences will be available for the top level of leadership in all major areas of society. Other courses of varying duration will be held for administrators and future

Qualities of the Unified Field

Since the unified field is a field of all possibilities, the qualities of the unified field are innumerable. A few of its characteristic qualities are described here in the light of the supergravity theory of quantum physics in order to give a glimpse of the benefits that the technology of the unified field can bring to individual and collective life:

1. Perfect Balance—supersymmetry: balance of bose and fermi fields. 2. Invincibility—though the physical particle states appear broken, the Lagrangian of the unified field remains eternally supersymmetric-the laws governing the unified field are inviolable. 3. Self-referral—the non-Abelian property of self-interaction. 4. Self-sufficiency—a unified gauge field, containing the whole of physics, interacts with itself alone. 5. Infinite Creativity—the fountainhead of natural law: from this unified source, sequential dynamical symmetry breaking gives rise to all the particles and forces of nature. 6. Infinite Dynamism—the quantum fluctuations at the Planck scale express infinite dynamism. 7. Infinite Organizing Power—the Hamiltonian of the unified field governs the time evolution of the entire universe. 8. All Possibilities—all the fundamental quantum fields are fully enlivened as dynamical degrees of freedom at the Planck scale of superunification. 9. Immortality—time translational invariance of the Lagrangian density of the unified field. 10. Nourishing the eternal continuum of self-interaction of the unified field sustains the time evolution of the universe.

All beautiful, evolutionary qualities spontaneously blossom in individual and collective life as the mind gains increasing familiarity with the unified field. This has been amply verified by extensive scientific research in the areas of physiology, psychology, sociology, and ecology and demonstrated in the lives of millions of people and in the improving quality of national life on all continents during the past 25 years. These achievements are at the basis of our global initiative to give a sweet taste of utopia to all mankind and 10 invite our family of nations to collectively create unified field based ideal civilization in our generation.

The sweet taste of utopia comes as the supreme gift of the Silver Jubilee Celebrations of Maharishi's worldwide Transcendental Meditation movement, 1958 to 1983. Maharishi declared 1983 to be the "Year of the Unified Field," INSTITUTE OF WORLD LEADERSHIP, MAHARISHI INTERNATIONAL UNIVERSITY, FAIRFIELD, IOWA 52556, USA Now, 1984 will be welcomed as the "Year of Unified Field Based Civilization."

As the figure shows, the unified field is basic to all other levels of natural law, including

the electronic and nuclear levels. Therefore, identification with the unified field brings the

advantage of the infinite creativity and organizing power of all the laws of nature to any

Walesa and the Sanctions

To those who believe the West's sanctions against Poland serve no further useful purpose, add now the name of Lech Walesa. leader of the Solidarity free union movement that succumbed to martial law two years ago Tuesday. The sanctions had been denounced again just a few days earlier by Wojciech Jaruzelski, the Polish leader, who blames them for the country's economic distress. It would be more just to blame his own autocratic leadership. But there can be no doubt that the sanctions have taken a toll.

Of Poland's condition, General Jaruzelski said. "People have a tough life." Mr. Walesa agrees. In his Nobel Peace Prize lecture read for him Sunday, he said that Poland is "in the grips of a major economic crisis. This is causing dramatic consequences for the very existence of Polish families. A permanent economic crisis in Poland also may have serious repercussions for Europe. Thus. Poland ought to be helped and deserves help."

But helped how? The previous Monday, Mr. Walesa had explicitly urged dropping "symbolic" sanctions, such as the U.S. bans on fishing and civil aviation. The more important sanctions restricting Poland's access to credits and loans should also be ended, he said, but in ending them the West should see that there are

"guarantees that describe how society will

control the money."

To this end, he offers the regime "dialogue" with a mass movement of these qualities: nonviolence, political restraint, acceptance of the constitutional order, patriotism and respect for Soviet security interests. He asks that the 1980 government-worker agreement be renewed, terming it "the model and the only method to follow, the only one that gives a chance of finding a middle course between the use of force and a hopeless struggle."

Within Poland. Mr. Walesa is under pressure from the regime, from underground Soli-darity militants and from a pervasive popular fatigue. Yet he remains a morally authoritative figure. His effort is to break the impasse in which Poland continues to be locked two years after the government outlawed its vital inter-

locator, Solidarity. It stings General Jaruzelski to find the West viewing Lech Walesa as an arbiter of Polish policy. What Mr. Walesa proposes, however, is a way for the general to bust the hated sanctions. Mr. Walesa is creating a bit of new political space in which the authorities in Warsaw and Poland's Western friends can, and should, try to maneuver.

- THE WASHINGTON POST.

Worldtax: An Ugly Reality

an idea that law professors kick around at the faculty club har. But it is no abstraction. On the contrary, it is an ugly reality. Twelve American states now levy unitary taxes; that is, taxes hased on the world income of multinational corporations. That angers America's trading partners, who argue that the system violates treaty commitments.

Last week the Supreme Court evaded the issue, leaving it for Congress to settle. There is a strong case for placing the limit on state taxes at the water's edge.

California and 11 other states have adopted

unitary taxes because they are frustrated by the perceived ability of multinational concerns to shift profits out of high-tax jurisdictions. Instead of calculating profits on sales or production within their borders, these states levy taxes in proportion to their share of a company's total husiness. Thus, a company with 5 percent of its total assets, sales and employees in California would be taxed on 5 percent of its profits worldwide.

Multinational corporations counter that unitary taxes defy common sense. Why should British Petroleum pay extra taxes to Florida when it discovers oil in the North Sea? How would Americans like it if France raised IBM's taxes every time it unveiled a new computer in Armonk, New York?

There may be a worse effect. Unitary taxes are a serious deterrent to job-creating internauonal investment. Most husinesses lose money for years before they establish themselves in a new region. But under unitary taxation, a of now, before other states adopt them.

successful multinational must pay income tax—

THE NEW YORK TIM

Multinationals may try to escape some taxes by deceptive accounting. But the unitary tax is an odd remedy. If states are being deceived by multinationals, the remedy is to tighten the administration of taxes based on income

earned in the United States. That would not be nearly as difficult as the states contend. Harvey Galper, a former Treasury economist. notes that Washington has a large stake in keeping the multinationals bonest. Internal Revenue now puts a high priority on policing the multinationals' returns. That could be done even better with the resources that unitary-tax states now expend on their own enforcement programs.

Until recently, there was hope that the courts would prohibit unitary taxes. But last June the Supreme Court ruled that the Container Corp. could be taxed in California on the basis of its parent's worldwide earnings. And last week the court refused to overturn a lower court ruling that Shell Petroleum N.V. of the Netherlands had no right to sue California for violating treaty prohibitions against discriminatory taxation.

The fate of unitary taxes thus rests with Congress and the president. The Reagan administration, reluctant to tamper with an easy way for states to raise revenues, is temporizing by assigning the problem to an interagency "working group." That is trivial and timid. Washington has a serious stake in keeping America attractive for foreign investment Worldwide unitary taxes should be gotten rid

- THE NEW YORK TIMES.

Other Opinion

The Danger in the Gulf

The explosions in Kuwait remind us of the ever-present danger that the Iran-Iraq conflict may spread. There can be little doubt that the coupling of French with American targets has to do less with the role France is playing in Lebanon than with France's open partis. on the side of Iraq, as well as its sponsorship of Iranian exile groups. Iran's most immediate fear, well publicized is that Iraq will use French-supplied weapons to cut off Iran's oil exports through the Gulf. Iran has threatened, should this happen, to see to it that no oil gets out of the Gulf

The present relative oil glut has made us a little blase about such threats. But if the interruption were complete, and even assuming that non-Gulf producers increased their exports by 4 million harrels per day, it has been calculated there would be a shortfall of 4.8 million harrels per day, equivalent to 11 or 12 percent of present Free World demand.

The threat posed by Iran is not to be taken lightly. The West has to be prepared to meet it militarily if it comes to that. But the military scenario hrings new and alarming risks with it. No diplomatic avenue for lowering tension in the area should be neglected.

- The Times (London).

A Syrian-Israeli Coexistence

For the Syrians. Lehanon is a piece of the flesh of their country. The Syrians suffered a military defeat in last year's war, and now they are trying to shore up their pride and position as a nation. I don't think they want to restart the war in Lebanon, and I don't think that the Soviets would like to see a conflict there.

either. Assuming all that, I believe that a [military] coexistence between Lehanon's warring factions could be established.

The heart of the problem is that Israel and the United States both insist on withdrawal of "all foreign forces" from Lebanon. For the Syrians, this is a nonstarter. We, the Israelis, with Lebanon, and we should not try to dictate to the Lehanese what kind of sovereignty they should have. I don't think the United States should do that, either.

If [President Amin] Gemayel worked out an understanding that would allow the Syrians to maintain a certain presence in Lebanon, we should accept that. We know from experience that we can live alongside the Syrians in peace. We have achieved a wonderful coexistence on the Golan Heights.

- Mordechai Gur, a leading member of the opposition Labor Party and former Israeli chief of staff, interviewed in Newsweek.

A Warning to North Korea

North Korea should consider carefully the international implications of the sentencing of two of its agents to death by Rangoon's Peo-ple's Court for detonating a bomb that killed four members of the South Korean cabinet. Criticism of North Korea has become louder. Pakistan has established diplomatic ties with South Korea, Costa Rica has broken its relations with Pyongyang, and Thailand has rejected North Korea's application to establish an embassy. Even Communist countries deplore what North Korea did. North Korea could become a friendless outlaw nation.

1908: Madrid Singer Duped by Rivals 1933: A Surprise for Admiral Byrd MADRID - Señorita Ursula López, who sings at the Zarzuela, bas been the rage these last two weeks. She has been enthusiastically acclaimed each evening as she left the theatre. so much so that the police have had to keep order, and even arrested a "guardia civil" whose feelings had run away with him. In a new piece at the Zarzuela last evening. Señorita Lopez was to wear dresses specially ordered in Paris, but uproar was occasioned when the performance was canceled. It appears that the singer received a letter warning her that a gentleman would commit suicide in a box as soon as she appeared on the stage. It was later aways to Wellington, and reluctantly signed found that the letter was a hoax, emanating

from rival artistes jealous of her success.

PHILIP M. FOISIE

ROBERT K. McCABE SAMUEL ABT

WELLINGTON, New Zealand - Nine hours

out of Wellington, on his way to the base in the icy wastes of Little America, Admiral Richard E. Byrd [on Dec. 13] discovered three polar

stowaways aboard his ship, the Jacob Ruppert. The discovery was made during boat drill, the three men having concealed themselves in a lifeboat. When called up on the bridge to explain themselves, they stated that they had attempted to sign on the Jacob Ruppert as seamen but had been refused. Admiral Byrd decided that the expedition could not afford to lose the time it would take to return the stowon the venturesome trio as deck hands. They will continue to the ice floes of the Ross Sea.

Today, thanks in oart to Christine Craft, we have been made aware of the periodic reshaping of hairdos and eyebrows that has long been part of INTERNATIONAL HERALD TRIBUNE the female television reporter's public deht. In the 70s it would not have occurred to me to cry out against KATHARINE GRAHAM WILLIAM S_PALEY, ARTHUR OCHS SULZBERGER such humbling tinkering with my profession. On Hanging On in Lebanon

A Quick Pullout Is the Best Option

By Gene R. Larocque and David T. Johnson

WASHINGTON — The United This perception inhibits political initiatives needed to resolve cominto a war in Lebanon that few Americans understand or will support for long. Marines are taking casualties almost daily, but Washington does not seem to know what it wants to achieve or what consequences may flow from expanded military action. There are three options: to increase U.S. military forces significantly, to maintain present force levels or to withdraw.

To chase the Syrians out, the United States would need at least 200,000 troops and supporting units in Lebanon plus a major naval force in the Eastern Mediterranean. Militarily, this is feasible. But it would be costly and very risky. Before tak-ing that road, U.S. leaders should decide what they would do with Lebanon once they took it over.

The Soviet Union is Syria's ally. It is quite possible that Russians will be killed if the fighting expands. Soviet leaders have warned that they may respond if pushed too far. Lebanon is close to the Soviet Union and far from the United States. The downing of the South Korean airliner, the invasion of Grenada and the deployment of missiles in Europe have left U.S.-Soviet relations in sorry shape. Moscow may indeed feel the need to act tough in response to any major U.S. buildup, and at the very least the possibilities for miscalculation and confrontation have increased.

Even if Moscow let Syria be defeated in Lebanon, American occu-pation forces would face the prospect of endless resistance and terrorism. The entire Moslem world might turn against the United States, including some of the major oil suppliers. So it is wishful thinking to believe that a military occupation of Lebanon can bring lasting stability to the Middle East. Ultimately, the United States would have to withdraw, leaving behind an even more unstable political and military mess.

What are the consequences of maintaining the status quo? If the United States chooses to keep the existing garrison of about 2,000 marines, it must expect frequent casualties, perhaps as many as 10 or 20 killed every month. The rebels on the high ground above Beirut air-port can be expected to continue their attacks; bombardment from offshore U.S. naval guns and aircraft will only increase the frequency and ferocity of these attacks. The American public will not tolerate such losses indefinitely, if for no other reason than the fact that the protection of civilian aircraft flying in and out of Beirut seems an insufficient reason for exposing the ma-rines to dangers against which they have little defense,

The third option - pulling the marines out - is the proper one. Of course, the United States will lose face. But the alternative is to lose a lot more face later. Common sense and concern for the marines point to their departure from Lebanon. To keep them in an exposed position is a gross violation of sound military strategy.

There is another important rean to withdraw soon. Although the U.S. soldiers were sent to Lebanon initially as an impartial peacekeeping force, the perception in the Middle East is that they are siding with one faction in the Lehanese conflict. that of President Amin Gemayel.

NEW YORK — It's good to be home. After nearly six years abroad. I am struck first of all by

what a good time it is to be a woman

in America. Speak not to me of a gender gap. I have lived for the past four years in London. I now feel a

surge of new life akin perhaps to what

a ghetto child might experience con-

templating an endless expanse of

My exhilaration comes from the

discovery that women are frequently

the most interesting people I meet in America today. They are women without a trace of the shrillness of the so-called liberated women of the 70s.

The sharp edge, the result of too

many years spent beating fists against bolted donrs, is gone. Self-confidence in repose has replaced it.

But that is about the only general-

ization I would venture about Ameri-

can women, beyond the fact that it is

a different group from the one I left

behind six years ago. But then the stage on which they move has also

For five years before my departure

been radically altered.

Don't Just Grab a Fig Leaf and Run By Joseph Joffe

airport in a fit of absent-mindedness. It is true that Syria and its authority in Lebanon. Farther Lebanese allies hold the better afield, the American withdrawal cards. It is also true that some kind would hardly be lost on the Ayatolinfluence in the region. The United States would still have a powerful military capability in the Mediterracards. It is also true that some kind of deal will have to be struck with Syria. It does not follow, however, that the United States should pick up the first fig leaf and run. There is first of all a matter of

principle that great powers can ig-nore only at their peril: You don't wave a big stick and then slink out after you have been slugged. To cut and run does not exactly boost a nation's reputation - and, alas, "reputation" is not just the figment of a macho imagination. In the afous advantage. Procrastination in

pulling out will mean a heavy price in lives and national prestige.

This is President Reagan's show. Only he can make the next move. When it was obvious to President John F. Kennedy that the Bay of Pigs invasion had failed, he had the courage to withdraw U.S. forces. After Viennam, Americans promised themselves they would never again become involved in a conflict they could not win. There is nothing to win in Lehanon. No one likes to run, but some battles are not worth the cost. Lehanon is one of them.

thing but uninteresting.

WASHINGTON — It is true ernment of President Amin Gemayel — not much of a government, perhaps, but, unfortunately, airport in a fit of absent-mindedlah Ruhollah Khomeini, who has already threatened to close the Strait of Hormuz, endangering an awful lot of Western oil. Nor would disengagement encourage King Hussem of Jordan to assume any

risks on behalf of U.S. peace plans. appropriate lesson: The United States may be an excellent address for arms purchases but a wobbly warrior when it comes to using its own military might. In the future these states could hardly be expect-ed to rally around U.S. interests.

Finally, there is Israel, recently designated as America's trustiest ally in the region. But even the Israciis would be unlikely to fight for U.S. interests once the marmes pulled out Instead, they would probably dig in behind the Awali River and proceed to cut a silent deal with the Syrians, cementing the partition of Lebanon.

Syria is the crux. In the Lebanese melee, there is no way around the Syrian president, Hafez al-Assad: He controls a third of the real estate, has long-standing security in-terests in Lebanon and has expend-ed too much blood and treasure there to leave just because of the Lebanese-Israeli accord.

But to get him to the negotiating table will require getting his atten-tion first. Right now, the Syrians determine the rules of the game and unless their position on the ground is made much more uncomfortable. they are highly unlikely to stop bat-

tling and start bargaining.

There are a number of ways that Washington could change the sig-nals short of sliding into a major war (which Mr. Assad, a consummate pragmatist, is not likely to risk anyway). Instead of offering an immovable target, the marines could shift toward "aggressive patrolling." Instead of suffering endless casualties at the hands of Syrian surrogates, the United States would hold the Syrians responsible for any attack originating behind their

lines in Lebanon.

The United States might also change the composition of its forces. Marines are good at establishing beachheads; they are not primarily trained to occupy and hold territory. Inserting armored in-fantry units, which come equipped with plenty of tanks, would send a twofold messsage: that American forces are not going to pull out tomorrow and that they have ways of striking out beyond their defen-

At a minimum, there should be no more ill-conceived missions like the one in which the Navy lost two aircraft. To neutralize the thicket of Syrian air defenses in Lebanon, there must be close coordination between strike planes, airborne surveillance equipment and flying radar-fighting gear.

Such a measured escalation is not without risks. But then the stakes are not exactly puny.

The writer a senior associate at the Carnegie Endowment for Interna-tional Peace, contributed this comment to The New York Times.

Is Jackson The Party's: Grinch?

By David S. Broder

WASHINGTON — Jesse Jack. son is beginning to look to many Democratic leaders like the Grinch who may steal their Christmas. The meeting the black presidential candi-date has set up for Monday with the Democratic national chairman, Charles T. Manatt, has the potential for spoiling the Democrats' hopes for a politically happy new year.

When Mr. Jackson entered the race last month, most Democratic officials thought he would add some needed fire to the party's assault on President Reagan and his policies.
Whatever their judgments on his motives and qualifications, they envisioned Mr. Jackson pulling thou-sands of blacks and young people into the anti-Reagan electorate.

But since he began his race, Mr. Jackson increasingly has focused his fire on the leadership of his own party and its allied interest groups, notahly organized labor. Lately, he has aimed his rhetoric at the party's delegate-selection rules. In a recent speech, be said the rules were the creation of "a handful of people" determined to "lock the masses our" of the choice of the party nominee. Normally, such complaints would be dismissed as tardy and insubstan-

tial, but Mr. Jackson, running third. in the polls for the nomination, can-not be ignored. That is why Mr. Man-att is meeting with him next week in a. probably foredoomed effort to turn

Mr. Jackson around.

The national committee approved the rules for the 1984 primaries on March 26, 1982. Ted Gay of Washington, D.C., the only black party. charman, says he has sympathy with some of Mr. Jackson's recommended changes — but only as they might apply to 1988. Reopening all the stakingly negotiated agreements... to re-examination at this point, two months before the first primary, is unthinkable, he said.

Officials can also make a strong case that Mr. Jackson is on shaky grounds in his substantive complaints. The new rules do provide more delegate seats for elected and party officials — who are mostly white males. But the requirement that state delegations be balanced racially and sexually is still in place. The new rules retain the affirmative action re-quirement that helped blacks gain one-seventh of the delegate seats in-1980, and strengthen the requirement. that state parties provide financial

aid to those who might not otherwise, be able to serve as delegates.

Finally, some officials think Mr. Jackson either misunderstands or deliberately is misstating the effect of some rules on his particular candidation. cy. He claimed in a television interview, for example, that the 20 percent threshold for winning a delegate is unfair to him because only 86 congressional districts have that many

blacks in their population. But blacks comprise at least 20 percent of the Democratic Party electorate nationally, and only Democrats are allowed by the rules to participate in Democratic primaries or . caucuses. There are more than 150 : congressional districts where blacks, comprise 10 percent of the population — and probably at least that many where they make up 20 percents. of the potential Democratic voters. Nelson W. Polsby, a University of California-Berkeley political scientist; observed last week that, even as revised, the Democratic rules make. factional mobilization" rather than "coalition huilding" the key to nominating success. "Only first choices count in primary elections or cancuses," Mr. Polsby said. "The only game in town is to try ... to mobilize one's own voters, to activate a faction, and hope for the best." That is a game Mr.
Jackson — with his black vote base

— can play as well as anyone.

But these arguments, like the rules themselves, are obscure to many. Few Democratic leaders doubt that if Mr. Jackson goes out with his fiery oratory to prove that "the masses" are being disenfranchised by labor and party bosses, he will find an audience. That raises a nightmare prospect

for the Democrats. Every time the party has split in recent years, the battleground has been a rules fight. In 1968, the protesters in Chicago claimed the rules had excluded them. — and Hubert Humphrey's nomina-tion was fatally tainled. In 1972, the rules and credentials fights over the California and Chicago delegations poisoned the atmosphere for George McGovern's victory. And in 1980, Jimmy Carter's renomination was But as I pack away my Laura Ash-ley prints in favor of the crisper lines of Manhattan tailoring, I realize that shadowed by the bitterness of the Kennedy forces over the imposition of the "robot rule" binding delegates to their original candidate choices.

Mr. Jackson said this week he

hoped to negotiate on the rules issue and avoid the kind of "gunter fight" that scarred the past conventions. But he also said it was such a "fundamental issue" that it "may require, convention action." That is a statement that sends

chills down the Democrats' backs. The Washington Post

LETTERS TO THE EDITOR

When a Defense Offends

Regarding "Reagan Decides in Principle to Begin Developing Space Anti-Missile Systems," (IHT, Dec. 2) by Francis X. Clines:

On the surface, the proposal to develop laser weapons for installation in space is difficult to counter. It appears to be a defensive program and it does not involve deploying more nuclear weapons. Regrettably, it is a much more destabilizing step than was the development of MIRVed (multiple warhead) weapons, or the emplacement of new nuclear weapons in Western Europe.

Can it be that the careful reasoning that led to the painfully negotiated Soviet-American agreements not to

policies. But her resignation, as well build anni-ballistic missiles or to put weapons into space has been lost on the White House? The case for these agreements was the idea that even defensive" weapons can increase the possibility of nuclear war. This is

because a uruly superior anti-nuclear

weapons system allows for the possi-

bility of a nuclear strike without fear

of retaliation. The threatened coun-

try feels forced to act. Today we face a changed scene. The United Sates is rapidly ontdistancing the Soviet Union in the computer revolution, and has demonstrated its remarkable ability to carry out crash programs in high technology. There is bound to be the perception in the Soviet Union that the United States will really be able to

pull off Mr. Reagan's latest scheme. This will merely result in a new form of arms race. There is no comfort in accepting the view of many scientists that a true anti-nuclear defense is technologically impossible. SHERMAN FRANKEL

Professor of Physics, University of Pennsylvania, Philadelphia.

Telling the Poll Story

Statistics don't lie. Opinion polls draw answers to good and bad questions. But if a badly structured questionnaire and lax statisticians come together, the result looks like the tahle on Page 6 of your Nov. 29 issue.

lowing are your greatest concerns for yourself and your country today?" I have a serious concern about the presentation of the answers. The graphics do not allow the reader to visualize the truth. Since the country totals are greater than 100 and are different by time and country, only

one kind of reading of the table is allowed: vertically for each single column. Neither: cross-time nor cross-country companisons are possible prior to standardization. It is inc sponsible to publish wrong graphic representations of numbers that are not comparable.

Paper Plates, Color-Coordinated Foo! Will Decorate Christmas Tabletops

ا حكذا من الأصل

By Jean Rafferty

Rock crystal, chocolate mice, a color-themed cuisine, irridescent opaline china or paper plates are but a few of the classic and campy tabletop decorations planned this holiday season by discriminating bostesses and inventive interior designers. Here is a peek at how a few of the world's most exclusive tables

■ ENGLAND: Countess Bathurst has chosen sentimental red and green to blend with the red, white and gold ancestral portraits at Cirencester Park, Gloucestershire, seat of Earl Bathurst. "I make a centerpiece for the long table, which seats 22, out of cedar pinecones, berries and Iwigs from the front lawn, building them into high pyramids set off by red Christmas balls. The gardener makes up Grinling Gibbons swags of holly, pine branches and leaves to deco-rate the door and fireplaces."

For David Laws of Colefax and Fowler, an interior design firm in London, Christmas dawns in a cozy country cottage. "My ideal table is for six, framed hy two lovely wing armchairs for host and hostess with the reds and greens of a marvellous fringed chintz table-cloth topped by a contrasting chintz square. For the center, I make six pyramids of lemons, and tangerines set in a ring. Use tooth-picks, and if the lower ones don't drip, it works. Finally, lots of gleaming silver, candlesticks and red candles, white roses, stacks of Christmas crackers, and peeking through the holly and bernes, tiny chocolate mice in white, milk and

dark chocolate." TALY: Krizia designer, Mai iuccia Mandelli, will have the ultimate in dramatic minimalism imagined by decorator Piero Pinto "A golden tablecloth and an atmosphere of small lights glowing from a whe of black plastic that undu-lates across the table like a sinuous

AUSTRALIA: Lady Tryon close friend Prince Charles calls her "Kanga") will be in ber native Melbourne with her four children. Australian Christmases are very traditional. Everything associated with a cold climate — bolly and mistletoe — is flown in. I'll have all the natural things as I can - roses. red and green shrubs for a centerpiece the length of the table, strings of red apples and mistletoe on the walls, Christmas crackers everywhere, and, of course, a proper hot luneb with a flaming pudding --despite the 120-degree heat -though afterwards it's straight into

the swimming pool."

UNITED STATES: New York decorator Alexandra Stoddard eschews the classic for a "springtime mix of yellows, warm pinks and greens. I do my table maybe it is because as one gets with original signed porcelains of older there is less time, you begin to vegetables - cabbages, asparagus, feel how fragile life truly is, that articbokes - and flowers - peonies, pansies and camelias - by Lady Anne Gordon."

Decorator Valerian Rybar dreams an enchantment "all in rock crystal. A very subtle, neatly arranged centerpiece will grow out of a mound of rock crystal — like a crystal stalagmite mixed with soft green leaves, white candles, white lilacs and white anemones on a silver tablecloth

In California, Paige Rense, the editor of Architectual Digest, will spend ber first Christmas in ber new country bouse. "My old French harvest table will be very informal and casual, using things found on the property - pinecone and boughs with a theme of vegeta-hles — persimmons and pomegran-ates for color and eggplants, com - a long, low arrangement on a runner of Art Deco fabric from my collection, using different Deco fabrics for the napkins. Sixteen unmatched candlesticks with white

A Primer on U.S. Tax Shelters

How the Wealthy Play the Game And What It Costs the Treasury

By Robert G. Kaiser

Washington Post Service

money invested in a tax-shelter deal - a erd of llamas, an apartment house syndication. hatever - need read no further. You already now how wealthy people can use or avoid the ix laws to stay wealthy in ways ordinary people now nothing about.

But ordinary people who never deducted an npaid accrued-interest payment from their tax eturn might like to know something about the orld of tax minimization and avoidance. It is a

leport, "a guide to tax shelter investing." You robably do not receive the inch-thick "confilential memoranda" sent to potential investors years from those write-offs. n real-estate syndication deals — a multi-sillion-dollar phenomenon that has trans-

ormed the big-time real-estate industry.
You probably never felt tempted to set up an afshore commodity stradule, or to buy Bibles at vholesale and contribute them as charitable feductions after marking up their purported /alue several bundred percent. You were probasly surprised to read about the charges that Sidney Poitier, Norman Lear, two prominent Washington lawyers and others were claiming deductions of up to \$1.8 million in a tax-shelter deal whose operators were indicted last month for criminal fraud. You are probably one of those people who just fills out the tax form. groans at the bottom line and writes out a check.

If any further evidence were needed to prove that the rich are different, the tax-shelter industry — that is the right word, industry — provides it. Here is a phenomenon that is of absolutely no use or interest to at least 85 percent of the U.S. public, but that keeps thousands of accountants and lawyers busy distorting the

national economy in a variety of ways.

There is a glut of boxcars in the United States because of tax shelters. The prices of downtown skyscrapers, oil and gas fields, garden apartment complexes, dairy cows and more have been significantly inflated because buying such things has created tax shelters.

Weight of Investigation

The Internal Revenue Service and the United States Tax Court are both in danger of collapsing under the enormous weight of investigation and prosecution of tax-sbelter abuses. And of course, because tax shelters work, they keep billions of dollars out of the Treasury that might otherwise be paid in taxes. Much of that is kept out legally, but perbaps \$5 billion a year illegal-

In the last 14 months, IRS auditors bave added more than 160,000 new cases of suspected tax-shelter abuse to the service's backlog: there are oow 350,000 cases. And no one thinks the IRS is catching all the abusers.

Also, no one knows bow the IRS can cateb up with this backlog, since it was only able to deal with about 96,000 cases last year. But abusive shelters represent only about 10 percent of the sbelter industry, according to Robert A. Stanger, who publishes The Stanger Report (as well as The Stanger Register and The Stanger Review). So we are talking about a huge illegiti-

mate business, and a much larger legitimate one. that allows the investor to avoid paying large sheltering. Bear with a more complicated - but ASHINGTON — All of you who have amounts of tax in return for what are often modest initial outlays. Income can be sheltered in three basic ways:

> Money that ordinarily would be given up in tax payments can be beld and invested until the later time when some tax will have to be paid.

An investment in a cattle breeding operation, ig world, protected from general scrutiny by a for example, can produce \$10,000 in tax write-rall of lawyerly jargon, which the U.S. Congress offs in the first and second years, but no income to the investor until the third year. So this If you are still reading, you must not bave a investor would have use of the government's nonthly subscription to Wealthbuilding (formerly Tax Shelter Digest), or to The Stanger taxes if he did not have this deduction — to invest. Even by putting it in a bank he could make, say, \$1,500 in interest payments over two

 By converting "income" into "capital gains" that are taxed less heavily than ordinary earnings. An investment that pays off quickly must be treated as ordinary income, on which a wealthy person pays a 50-percent tax rate. But if the payoff is delayed for more than a year, the earnings become a capital gain, taxed at no more than 20 percent.

\$10,000 a year, Theoretically, depreciation covers that portion of a building's value that is lost as it gets older — as it gets older, supposedly, it gets less valuable. Depreciation can be deducted from taxable income. But as the owners, for example, of 150-year-old houses in affluent, restored areas across the country can tell you, a building's value after 15 years can be higher, not lower, than at the time of purchase. In fact, an investor can pocket \$150,000 in tax deductions tworth \$75,000 in cash if the investor is in the 50-percent tax bracket | and then sell his building for a big profit. The profit, of course, is not ordinary income, but a "capital gain," because the investor held onto the building for more than one year, So it would be taxed at a rate of no more than 20 percent.

 By borrowing part of the original purchase price of a depreciable item, a taxpayer can "leverage" — that is, inflate — his tax write-offs way beyond the amount he actually put into an investment. Say you bought that \$150,000 building with \$30,000 in cash, then got a mortgage for the remaining \$120,000. You can still depreciate the full value of the building, so over years the cash value of your depreciation (\$75,000) is two and a half times your initial investment. Also, you still get to keep the profits when you sell the building, after paying the capital gains tax on those profits. Also, you can deduct the interest paid to the bank on your mortgage during the 15 years - more cash in your pocket. (As every bomeowner knows, interest payments are deductible from taxable

The ideal shelter arrangement creates tax deductions of at least \$2,000 for every \$1,000 invested. An investor in the 50-percent tax bracket keeps \$1,000 if he has deductions worth \$2,000, so a shelter this good makes the initial investment, in effect, free, Many shelter pro-

tate business, and a much larger legitimate one.

But the foregoing examples are simpleminded. They utterly fail to capture the poetry of tax more realistic — example: Start with an office building worth \$1 million

in the marketplace. A syndicate of investors - By deferring tax payments from the present to some future time. If an investor can structure a deal to accomplish this, be in effect borrows money from the federal government at no cost.

In the that capacity A synthautic of investors say 10 of them — band together to buy the building for \$1.3 million. They would appear to be paying 30 percent more than the building is worth, but in fact, they are working a scheme to enhance tax write-offs. Watch.

Members of the syndicate go to a lender say a savings and loan association. They arrange mortgage on the building for 80 percent of their purchase price -- \$1.04 million - at a nominal interest rate of 14 percent. But the S&L makes a special deal. It offers the loan at 8percent cash interest and 6-percent accrued interest. Accrued interest is not paid during the life of the mortgage, but at the end of its term.

However, the syndicate will claim the full 14percent interest as a tax deduction, and the S&L can carry the 6 percent accrued (that is, for now unpaid) interest as an asset on its balance sheet, as though it is receiving the money year by year. The S&L is willing to make this deal in part because it is only paying its small savers who put their money in its care a 71/2-percent passbook rate. So even the g percent the syndicate is paying in cash interest covers the S&L's costs for raising that much money.

If you buy an apartment bouse for \$150,000 As for the syndicate, its out-of-pocket costs this year, you can "depreciate" it at a rate of are covered by tenants in the building, whose As for the syndicate, its out-of-pocket costs rent payments are just enough to meet the 8percent interest that the syndicate has to pay in cash each year on the mortgage, the repayment of principal on the mortgage and the taxes it pays on the building. (Property tax payments can also be deducted from taxable income.) In other words, after putting up an initial cash investment of \$260,000, the syndicate has oo further expenses for 15 years, provided the building stays rented.

Meanwhile, the syndicate is collecting big oney. It paid \$1.3 million for the building, but \$100,000 of that covered the land on which the building stands. Land cannot be depreciated, but the building itself — now valued at \$1.2 million for tax purposes — can be depreciated over 15 years under the Reagan tax bill of 1981. This depreciation is worth \$80,000 a year in tax ileductions to members of the syndicate.

In addition, the syndicate can deduct the "cost" of the 6-percent "accrued interest" portion of their morngage, even though this interest is not being paid until the end of the 15th year. This adds up to an additional \$62,400 a year. (The 8-percent interest actually paid is also deductible, but we are assuming that this deduction, together with tenants' rent, helps the investors repay the principal on the mortgage.) So as a group, members of the syndicate can deduct \$142,400 each year from their taxable income. If they are in the 50-percent bracket, reducing their tax liability by that much will save them in cash - \$71.200. (If you are in the 50-percent bracket, 50 cents of every dollar you can deduct from taxable income is money in your pocket.)

The syndicate's 10 members each put up \$26,000 in cash to get into the deal. Now they each get one-tenth of the project's yearly tax deductions, worth \$7,120 to each of them. In other words, they each get a return on their own capital of more than 27 percent a year.

From cattle breeding to urban real-estate ventures, tax shelters have become an industry with billions of dollars at stake.

or \$1,068,000 over 15 years - comes out of the packagers of these deals are often as much as 25 huge incentive to shelter income. If capital gains U.S. Treasury. The building did not make any money — the tax deductions make money.

But the deal is not over yet. The endgame can

get complicated. Ideally, the building goes up in value during the 15 years, so the partners sell out at a profit, pay off the accrued interest and still have money left over for themselves. But there are many other possible outcomes, most of them favorable for the investors, but too complex to

Remember, everything described so far is legal. Not surprisingly, the real-estate syndica-

tion business is booming.

According to The Stanger Review, public sales of shares in real-estate limited partnerships totaled \$3.7 billion through October of this year, up from \$1.9 billion for all of last year. In other words, real-estate syndications in the public market are up nearly 100 percent above last year, with two months of the year left to count.

Altogether, Robert A. Stanger predicted in an interview, public offerings of tax-shelter deals of from real estate to dairy cattle and Hollywood movies - will total more than \$8 billion this year. Last year it was \$4.2 billion. Mr. Stanger estimates that perhaps another \$6 billion will be raised privately for similar deals. Other experts say the private market may total \$10 billion to \$25 billion.

Some Cautionary Advice

These are enormous numbers, representing a large proportion of all the capital being raised in America this year. The major stockbrokerage firms are now entering the business in a big way, including E.F. Hutton, Merrill Lynch, Kidder Peabody and others. Shares in syndicates that buy real estate, oil and gas properties, equip-ment for leasing and so on sell for as bitle as

her words, they each get a return on their own pital of more than 27 percent a year.

And where does that payout come from? Here their worth. Several Wall Street operators noted is the nub: Every penny of it - \$71,200 a year, that the commissions and expenses paid to the percent to 50 percent would not eliminate a richer.

percent or more of the total invested. Moreover, there is no guarantee that these deals will be as successful as their promoters promise. Mr. Stanger noted, for example, that the southwestern United States is now littered with underoccupied garden apartment complexes built or bought by real-estate syndicates. "If you can't get tenants," he ooted, "the money you lose is real money."

So why are people investing so heavily in these shelter deals? Mr. Stanger and others who think shelter syndications are good for the economy say the deals themselves must have economic merit, or people would stay out of them. The Reagan administration says the boom in these investments — which the administration considers good examples of invitual "capital formation" - is just what they hoped for.

But others wonder if the arge to evade federal taxes sometimes overpowers investors' good sense. One large real-estate investor predicts flatly that many of the current deals will go sour. A major investor in the Midwest, who says he prefers to pay his taxes than to look for shelters, says many of his wealthy friends had an irratio-nal compulsion to evade taxes, and this led them into unsound investments.

Testifying on behalf of the Reagan tax-cut bill in 1981, David A. Stockman, the director of the Office of Management and Budget, predicted that cutting the top income tax rate from 70 percent to 50 percent would eliminate the need for tax shelters. The cut was made, but since 1981 the amount of money invested in shelters has tripled or quadrupled.

"The greed factor operates to an astonishing degree," observed Kenneth W. Gideon, who served until last May as chief counsel of the IRS. He was speaking about illegal or questionable shelters, but the remark applies generally.

Mr. Stockman should have understood that these deals won't be available." even cutting the top income tax rate from 70. But by then, the rich will be considerably

can only be taxed at a rate of 20 percent, that offers at least a theoretical opportunity to save 30 cents on every dollar that can be converted from ordinary income to capital gains. And an investor who stands to lose half of every dollar be earns is bound to be tempted by deals that offer the prospect of saving more than half.

Moreover, the U.S. tax lawyers and accountants - and every wealthy American uses the services of one or both - have a subtle but inmistakable incentive to push their clients into tax shelter deals. A good shelter proves the tax adviser's worth; it can often line his pocket, too. One wealthy investor noted that promoters of tax shelters have one devastating line that usually ends their sales pitches: "You can either write a check to me, or you can write it to Uncle Sam."

So tax shelters flourish. Since 1969, Congress has passed a series of measures to try to reduce the abuses. The IRS is cracking down on abusers. But so far all of this has had no evident effect. Conceivably, reforms in the last few years will — when they begin to bite in the next few years — scare shelter seekers out of shady deals.

But it is probably more important that Congress has created a whole set of new sweet opportunities for big investors that have encouraged the incredible boom in tax sheltering U.S. lawmakers, have actually encouraged wealthy Americans to pay much less tax than they have

in many years.

But is this actually inducement to create real new wealth through productive new invest-ment? Some think so. But a Washington realestate man who doubts it observed that the deal for investors is now too sweet. No serious developer would plan a big new project today in the hope he would sell it out to a real-estate tax-shelter syndicate when it is finished in eight or nine years, he said. "In eight or nine years Congress will have changed the law again —

Big Business of Illicit Drugs: A Growth Industry of Surging Demand, High Profits

Mathea Falco is a San Francisco lawyer who bought the support of key military commanders profits that are spent locally tend to go for with money supplied by cocaine dealers. In luxury goods, most of which are imported, rath-

By Mathea Falco

New York Times Service

SAN FRANCISCO — The international drug trade is no longer a baphazard or even a particularly shady undertaking. In the last 10 years, illicit drugs have become one of the world's most lucrative and dynamic industries, with revenues so enormous and so dispersed over the surface of the globe that they can only be guessed at.

In the United States, Exxon is the only corporation with annual revenues in excess of the \$79 billion that, according to the Drug Enforcement Administration's most recent estimate, is generated every year by the sale of illicit drugs. And, the National Organization to Reform Marijuana Laws reports, marijuana is currently the second-largest U.S. cash crop, after com and just ahead of soybeans.

Like any other growth industry, this one is run by people of ambition and vision, by executives and entrepreneurs, often from the middle class, backed up by a full complement of bank-ers, lawyers and financiers. Stimulated by their enormous - and untaxed - profits, they keep a sharp eye on growth rate, territorial expansion

In many less-developed countries of the Third World, drug trafficking, has provided a new way to earn vast sums of hard currency, and it is transforming whole economies. In Colombia, according to its National Institution of Financial Associations, marijuana and cocaine together produce more foreign exchange than coffee and cut flowers, the nation's chief lawful exports. As a result, Colombia has the healthiest balance of payments in Latin America. In Jamaica, the U.S. Drug Enforcement Administration says, an annual marijuana trade of \$1.2 billion accounts for more revenue than all other

Response to Demand

The driving force behind the world's escalat-ing drug traffic is, simply, escalating demand. The National Institute of Drug Abuse estimates that 56 million Americans have smoked marijuana, and 22 million have ingested cocaine. And, for the first time in half a decade, heroin use in the United States, particularly in the big cities, is on the rise.

In other countries, the international drug traffic is having an even greater impact, eroding the traffic in illicit drugs have greatly distorted the stability of social and political institutions range economies of those drug-producing countries, ing from banks to courts to governments. In Colombia, Bolivia and Peru, many farmers stability of social and political institutions rangmany of the countries where drug trafficking have turned from growing food crops to growhas become a major economic force, most notably Bolivia and Peru, the traffickers openly use money — and violence — to intimidate government officials, thereby challenging the viability of democracy itself.

refined -- underwent yet another military coup, this one led by General Luis Garcia Meza. General Garcia Meza, according to officials of But the producing countries retain only a the Drug Enforcement Administration, had fraction of the drug-trade profits. Moreover, the General Garcia Meza, according to officials of

Gomez, responsible for, among other things, state security, provided protection to traffickers, in return for a sbare of the profits, and the minister of education, Colonel Ariel Coca, also was deeply involved in the cocaine trade.

In October 1982, the generals turned over power to a democratically elected president, Hernán Siles Zuazo. The Siles administration is highly unstable, however, weakened by a slumping economy — and by domestic criticism that, despite its dismissal of dozens of officials implicated in cocaine traffic, it is ineffective at curtailing that movement.

Drugs, Money and Guns

Ironically, the problems of cocaine traffic and money are inextricably linked; While Bolivia's lawful foreign-exchange earnings, derived primarily from the export of tin, account for \$800 million a year, cocaine is estimated to generate as much as 10 times that amount. Consequently, the drug traffickers in Bolivia are at least as powerful as the government. What's more, they have more money than — and weapons and equipment as good as - the armed forces and the police.

Countries do not bave to be producers or refiners of drugs to be able to make money from the drug traffic or to use that money to political advantage. Bulgaria no longer grows opium poppies for medicinal morphine and codeine. However, its government, motivated apparently both by a desire to exacerbate the drug-addiction crisis in the West and by the need to obtain hard currency, openly tolerates the transit of heroin across its borders. With five million tourists a year. Bulgaria provides an ideal site for the movement - and purchase - of drugs on the way from the Golden Crescent of Afghanistan, Iran and Pakistan to Western Europe and the United States.

The Turkish terrorist Mehmet Ali Agca, who sbot Pope John Paul II in May 1981, maintains that he was financed by Turkish drug smugglers with close ties to Bulgaria's security police. In addition, there is credible evidence, according to the U.S. State Department, that officials from the Bulgarian state export corporation. Kintex, bave been involved in trading guos for drugs with both leftist and rightist terrorist groups in Turkey.

The massive sums of money generated by the ing marijuana and coca, from which they routinely make three to four times as much money a year. In the mountainous Sierra Nevada de Santa Marta region of Colombia, for instance. where 45,000 acres (18,000 hectares) are given In July 1980, Bolivia — a prime producer of over to the cultivation of marijuana, 82 exportcoca, the shrub from whose leaves cocaine is ers make \$700 million in annual profits, according to Colombia's National Assocation of Fi-

nancial Institutions.

served as assistant secretary of state in interna-tional narcotics matters during the Carter admin-deed, U.S. government intelligence sources say, er than long-term investment in industry and his regime was rife with cocaine connections:

The new interior minister, Colonel Luis Arce

\$300 million of the billions earned from sales of agriculture. In Bolivia, for example, only about coca and cocaine remains there. In Colombia, less than a third of the estimated \$3 billion generated annually by the cocaine and marijusna traffic stays in the country.

At the same time, some American financial institutions are also reaping enormous profits from the billions of dollars generated by international drug dealing, principally by assisting traffickers in moving large numbers of dollars from one country to another and in "launderthose dollars through legitimate invest-

A joint investigation by the U.S. Treasury and Justice departments, begun in 1980 and dubbed Operation Greenback, identified several Florida banks, among others, that had actively solicited traffickers' accounts. These banks provided the traffickers with such services as wiring drug money to offshore banks that were set up specifically for that purpose and providing letters of credit for the purchase of legitimate businesses. Operation Greenback resulted in the arrest of 61 major narcotics traffickers and the scizure of

States, enforcement officials argue, is to destroy those drugs at their source, rather than try to stop them at U.S. borders or search for them once they are already in the country. As a result, U.S. international drug policy has, since the early 1970s, been focused on working with foreign governments to belp them strengthen their own narcotics-control efforts. But, while the logic of this policy is appealing, it has been only marginally successful.

In 1975, the Mexican government, with American assistance, initiated a program to eliminate its marijuana crop by spraying it from the air with the herbicide paraquat. Mexico, then a major supplier of relatively cheap, low-potency marijuana to the U.S. market, effectiveby destroyed much of that crop. But what survived the paraquat spraying still flowed north, where it caused widespread concern among marijuana smokers and public-health officials. As a result, though not exactly according to plan, imports of Mexican marijusna began to

Jamaica and Colombia, previously only minor suppliers of marijuana, quickly stepped up production. Their marijuana has a much higher potency. At the same time, American domestic

The most cost-effective way to reduce the quantity of illicit drugs coming into the United deed, it was in the wake of the Mexican spraying panding their production of coca. Colombia that it became such a prominent cash crop domestically. When, in 1980, the United States urged Co-

lombia to suppress rapidly expanding marijua-na cultivation in its remote Guajira Peninsula, officials in Bogota, responding privately to State Department representatives, said that the United States only wanted to protect its own burgeoning marijuana industry from foreign com-

Recently, Colombia has received a proposal from the Reagan administration that it undertake, with U.S. aid, a multimillion-dollar manijuana-eradication program, based on the actial spraying of paraquat - even though, as Colombians like to observe, marijuana eradication in the United States is effected with the much slower cutting-and-burning method. Even if President Belisario Betancur agrees to

defy the powerful economic and political forces arrayed against him at home and to authorize the herbicidal eradication, it is unlikely that marijuana availability in the United States would be substantially reduced. American marijuana growers are, as the Colombians note, ready and able to take up the slack.

Furthermore, Colombian traffickers might

currently receives 95 percent of the coca leaf and coca paste that it refines into cocaine from Bolivia and Peru. But several Colombian states are ideal for large-scale coca cultivation, and the trafficking organizations already in place could move rapidly to establish an agricultural

At the same time, the Peruvian and Bolivian traffickers, faced with the loss of the Colombian market of their raw materials, would themselves probably expand into large-scale cocaine refining, then undertake direct exporting to the Unit-ed States. Although it would take these two countries time to locate their own sources for the chemicals used in the refining of cocsine and to set up an international transportation network, the United States would still, eventually, find itself contending against three independent Latin American cocaine sources, where only one -Colombia - exists at present.

An Oversupply of Coca

Already, an oversupply of Bolivian and Peruvian coca, supplemented by the burgeoning Colombian production, has driven down the price of coca paste from \$600 to \$350 a kilogram. In turn, a kilogram of cocaine, which a year ago sold for \$60,000, can now be purchased for \$30,000. If there is vigorous three-way com-petition for the U.S. cocaine market, prices will drop even further, making cocaine affordable to

many more users.
It is very difficult to persuade a foreign goverument to take the serious political and eco-nomic risks that are entailed in an all-out campaign against cocaine production when the American demand for cocame is so well-known. American demand for cocame is so well-known.

And it is virtually impossible to convince foreign growers of marijuana to stop producing
when one American in four has mied the drug and billions of dollars in profits are being made by marijuana growers in the United States.

What little progress has been made in reducing cocaine and marijuana use in the United States has been the result not so much of law enforcement as of education and rehabilitation A statewide poll in California last July reported that the number of adult marijuana users had dropped 5 percent since 1979, the result, the poll found, not of lear of prosecution but of concern about health. Even so, the Reagan administra-tion has cut federal dollars for prevention and treatment programs by more than half.

The drug problem that the United States faces shows no signs of going away. Cocaine traffic is increasing and, given the likelihood of a significant street-price reduction, will probably continue to do so. Marijuana consum is predicted at least to hold steady. Heroin use is seguning to show an upturn.
Still, the multinational, multibillion-dollar

drug traffic has not yet become the subject of open public debate in the United States. Many eople have an interest in not focusing public attention on it too closely: government officials and politicians fear of being held responsible for the magnitude of the problem, bankers need to shore up confidence in the integrity of banking The cumulative effect has been to conceal the real dimensions of the problem.

A bag of coca leaves, which can be made into cocaine, on Bolivia, where it is chewed by Bolivian Indians, but much of sale at a market in La Paz. It is legal to grow coca in the coca crop is now being turned into cocaine for export.

BUSINESS PEOPLE

3 Executive Vice Presidents Planning To Retire Jan. 1 at Banque Indosuez

The management team of Banque Indosnez, one of France's foresnost international banks, will undergo a major transformation Jan. 1, when three of its executive vice presidents retire.

Beinard Hiszet, 47, succeeds Alain Felix as head of the International.

Division while Bernard Simon-Bar-Robert-Gorsse in the Corporate Fi-nance Department. Philippe Gestin. 43, will take charge of the Domestic Corporate Banking Department from

Mr. Haizet, who joined the bank in 1971, was previously regional manager of the bank's North American Division. Mr. Simon-Barboux moves over from the Groupe Drouor insurance company, where be was chief executive, and Mr. Geslin moves up from Banque Indosuez's Leasing and Real Estate Department, where he was a senior vice president Despite retirement, Mr. Felix, Mr. Robert-Gorsse and Mr. Tual are to work in various capacities for subsidiaries of

Bergard Haizet

A bank spokesman said a younger management team will assist the development of the bank's long-term strategies. The Paris-based bank, whose total assets in 1981 were more than \$24.4 billion, has an extensive presence abroad, particularly in the Middle and Far East.

Chairman of Shell Français Retiring

Leonard Carons, chairman and managing director of Shell Français, has announced that he will retire in June 1984, and Henri Practice will join the board in February before succeeding Mr. Carous. Mr. Pradier is currently vice president in charge of marketing for Shell Prançais. When he moves up his position will be filled by Bernard Calvest, who is currently chairman of Belgian Shell.

Control Data France Picks Petersen

· Jack Petersen has been appointed chairman of the board and general manager of the computer company Control Data France. Mr. Petersen was general manager of CII-Honeywell Bull from 1976 to 1982. He replaces Jean Camezecca, who remains a vice president of the company with special responsibilities for development.

Other Appointments

The Bank of Ireland has appointed John H. Stanley to its new post of director-Northern Ireland. Mr. Stanley, who is currently director-international banking, will be responsible for coordinating all the Bank of Ireland group's activities in Northern Ireland. A spokesman for the Dublin-based bank said the creation of the post reflects an increased commitment to the development of the bank's business base in Northern

Jacques Mitterrand, brother of President Prançois Mitterrand of France, has become vice president of the French engineering company Turbomeca. Mr. Mitteirand, who quit the chairmanship of Aerospatiale in May, succeeds Soula Meton, daughter of Turbomeca's president, Joseph Szyvlowski. She retains board membership.

Lloyds Bank International has named F. Michael P. Riding principal manager of its Far East Division. The division is responsible for all the bank's operations in and with East Asia, the Indian subcontinent and Australasia. He succeeds H.M. Ellis, who has moved to the bank's

W.W. Allen is to take over as chainman and managing director of Phillips Petroleum Co. U.K. Jan. I. Mr. Allen, currently operations manager for the Ivory Coast region, will succeed C.L. Wyndham who is leaving London to become manager of the Exploration Division at the company's headquarters in Oklahoma. F.L. Sandridge, London-based manager of African exploration for Phillips Petroleum Co. Europe-

Africa, is to replace Mr. Allen in Abidjan.

A. Scott Johnson has joined Bahrain-based Trans-Arabian Investment. Bank as vice president of the International Division, with responsibilities . for developing business in Middle Eastern countries outside the Gulf.

— Before joining TAIB Mr. Johnson was vice president-Asia, Middle East

– and Africa for First Bank Minneapolis.

22 R. Clark succeeds D.LS. Hanton as chairman and managing director of the British manufacturers BICC PLC Jan. 1, when Mr. Hinton becomes director of corporate planning and development. Until 1981 Mr. Clark was managing director of Plessey International's Components Division.

Bankers Trust Co. has named Peter F. Stevenson general manager of its branch in Bahrain. He succeeds Robert L. Cummings, who is returning to the bank's New York headquarters to become regional manager for North America within the bank's Trade Banking Division.

Hong Kong Recovery Weak, Tentative

BUSINESS/FINANCE

By Steve Lohr

New York Times Service HONG KONG — The hotels are packed. The stores are teeming with shoppers. Exports are streaming toward foreign markets.

The music of Hong Kong's central district, both day and night, is the industrial staccato of riveters' guns high up in the ironwork of the new headquarters being built for the Hongkong and Shanghai Bank-

Hong Kong these days has some of the look and feel of a place that is booming. But the appearance, economists and executives agree, is misleading: The new-found strength in the Hong Kong economy is

The pace cannot be sustained, the experts agree, unless businesses start investing to upgrade and expand operations—something there is bitle stomach for now. "I am all but begging companies to borrow from us," said David K.P. Li, chief manager of the Bank of East Asia. "But there is no demand for industrial loans."

The property market, too, has shown few signs of life. The plunge in prices during the past two years — a disaster for a few big real estate conglomerates, notably the Carrian Group, that went into bankruptcy - now seems to be over. Yet the property business is not bouncing

back.

The problem is the continuing uncertainty over what will happen to Hong Kong after Britain's 99-year lease from China on 90 percent of the colony runs out in 1997.

China will reassert its sovereignty over Hong Kong But the question is how it will do so, whether the territory's free-market system will be interfered with by Beijing.

Talks aimed at settling Hong Kong's future began last fall when Prime Minister Margaret Thatcher of Britain met with Chinese leaders in Beijing. Both sides have pledged that the colony's "prosperity and stability" will be maintained, but that vague assurance has done little to allay fears in Hong Kong. done little to allay fears in Hong Kong.

The seventh round of formal discussions ended Thursday, and

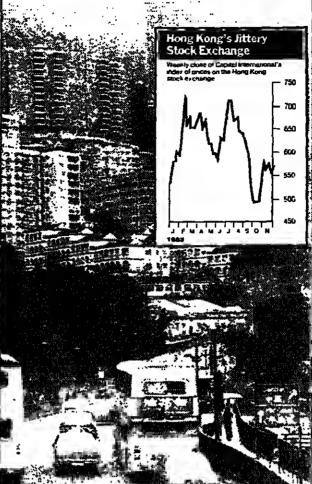

diplomats concede that little progress has been made. The word most often used to describe the mood of the colony is "volatile." Just how volatile was demonstrated in late September. After some

acrimonious comments by British and Chinese officials, a round of talks ended without the usual phrase declaring the sessions "useful and constructive." The result was near-panic in Hong Kong. In a few days, the value of the Hong Kong dollar fell 14 percent. People rushed to stores to hoard what are considered the three staples of life here: rice, toilet paper and liquor.

Things have calmed down considerably since then. On Oct. 15, the government announced a program to stabilize the currency, tying it to the U.S. dollar at a rate of 7.8 Hong Kong dollars to \$1. So far, the plan seems to have worked. The Hong Kong dollar has remained steady and interest rates have eased.
"What we've essentially done is to link the Hong Kong economy to
the United States economy, warts and all," said Sir John Bremridge.

the colony's financial secretary. The program will remain in effect at least until the U.S. presidential election next year. There is little risk for Hong Kong in being linked to the American economy during that period, Sir John figures, since the Reagan administration will be straining to maintain growth,

Hong Kong, which exports more than 90 percent of the goods it produces, is benefiting from the strong recovery in the United States
—which buys 40 percent of the colony's exports —and the weakness

of the Hong Kong dollar, which makes Hong Kong's exports cheaper and attracts more bargain-hunting tourists.

Private economists generally agree with the government forecast of real growth of 6 percent and 6.5 percent this year, up from 2.4 percent in 1982.

Through the first nine months of this year, Hong Kong's exports are running 20 percent ahead of last year's, Even after accounting for inflation of more than 9 percent, this represents a real increase of more than 10 percent.

Moreover, the rebound in exports did not start until the second quarter, so the recent performance is stronger than the year-to-date (Continued on Page 13, Col. 3)

U.S. Retail Sales Climbed a Strong 1.9% Last Month

WASHINGTON - U.S. retailers' sales rose a strong 1.9 percent the last nine months, as Christmas a record, the government said

"Retailers are enjoying the merriest holiday selling season in many years," Commerce Secretary Mal-colm Baldrige said.

He said consumers have stepped up their spending, "bolstered by large income gains, the highest pre-Christmas readings for consumer confidence in five years and the momentum of favorable economic

Private economists agreed, noting that the sales figures are season-ally adjusted in discount for normal Christmas-season increases. They said that increased hiring and greater confidence in the economy particularly recent predictions for a stronger-than-expected fourth quarter - are prompting people to buy more this year than they did during recent Christmas seasons,

The Commerce Department said retail sales last month intaled \$102.5 billion, up from \$100.6 billion in October.

The 1.9 percent gain was the largest since the 3.1 percent of May and followed the revised 1.4 percent increase of October.

But "If last Christmas hadn't been so lousy, we wouldn't be looking at a 1.9" percent increase, noted David Ernst of Evans Economics

A department economist, Ago Ambre, called last month's figure "a pretty brisk pace. If we keep on like this, we'll wind up with a 14.1 percent increase for the year" at an annual rate, he said. In compari-son, he said, sales increased only 5.8 percent from December 1981 to December 1982.

Tuesday's report said sales of durable goods rose a strong 4 percent, including a 5.4 percent advance for shoppers spent at the steepest clip autos. Sales by automotive dealers in years and auto industry sales set rose to \$20.4 billion, breaking the

record set in June. With sales of building materials also advancing, the only decline for stores selling durables — items ex-pected to last three or more years

was among furniture stores. Sales of nondurables climbed 0.9 percent, with gasoline stations the only major category showing a de-cline and clothing stores gaining for the second month in a row after a four-month slide. Other details of the November

 Sales for durable-goods stores amounted to \$34.4 billion, up from \$33.1 billion in October, while those for non-durables were at

\$68.1 billion, up from \$67.5 billion. There was a 1,3 percent advance for building materials, hardware and garden-supply dealers, up from a 0.7 percent increase in Octo-

Sales by furniture, home-furnishing and equipment stores fell 1.9 percent after having gained 0.9

percent in October. · General-merchandise and de-

partment stores showed an increase in sales of 2.8 percent, including a 0.5 percent gain for grocery stores. All figures are adjusted to dis-

count for normal seasonal varia-At the White House, Larry

Speakes, President Ronald Reagan's spokesman, said, 'This steady retail-sales trend indicates that the economy is moving forward and this should be good news for merchants looking for strong Christmas sales,

To Conclude SMH Deal

By Stephen Jukes

FRANKFURT — The speed with which Lloyds Bank of Britain has agreed to snap up the still healthy operations of Schröder, Münchmeyer, Hengst & Co., the bank, has restored confidence in a bail-out that was threatening to lose its direction, according to bankers.

In accepting Lloyds' entry into the West German banking market, the major West German banks involved in the negotiations concede that their objective was to maintain the momentum of the rescue operations for SMH, the worst banking crisis since the collapse of Bank-haus ID Herstatt in 1974.

"With every day that passed another of SMH's portfolio customers would switch investments to auother bank and nobody could be sure how long the dealing staff would stay," one banker said in stressing the need to find a buyer as soon as possible.

The three biggest West German commercial banks are believed to have snapped up a number of SMH's customers in recent weeks, as did one of Lloyds' direct competitors, Trinkaus & Burkhardt, now 92-percent owned by Midland Bank of Britain.

On Monday Lloyds announced a preliminary accord to buy parts of SMH's commercial-banking business — excluding the loans and liabilities associated with the now bankrupt companies IBH Holding and its Wibau unit - plus all its securities operations. These securisecurities operations. These securi-ties-trading operations on the facing the rescue consortium of up Frankfurt bourse were primarily to 800 million DM.

responsible for SMH's prestigious name in the West German private banking world and escaped relatively unscathed from the crisis.

David Pirrie, general manager of

Lloyds, said in London that the bank plans to double the size of its business in West Germany with the "SMH is still a very good name,"

he said. "We would certainly like to maintain the flavor of a German private bank even though it is now owned by us.... But no decision has been taken on a name at the The West German commercial

banks are financially the ultimate losers, because the proceeds from

Pound, Franc Set New Lows Again

Compiled by Our Staff From Dispatches LONDON - The British pound fell to a new low against the dollar Tuesday after senior U.S. oil-industry sources said the price for Britain's North Sea oil might be cut by as much as \$1 a barrel.

In response, the pound fell to close in London at \$1.4190. more than a cent down from Monday's close at \$1.4310. The pound slipped further in New York, reaching \$1.4157 from \$1.4262 Monday. Other European currencies

also lost ground Tuesday on concern over U.S. interest rates and international tensions. The Deutsche mark was one pfennig down at 2.7635 to the dollar at the Frankfurt close, and the French franc slid seven ceutimes to a new low of 8.4030 in the dollar in Paris. In New York, the Deutsche

mark closed off at 2,7690 from 2.76 Monday and the French franc down to 8.4525 from 8.4075. (Reuters, UPI)

NYSE Falls as It Focuses On Cloud in Silver Lining

BUSINESS BRIEFS

BNOCMay Soon Cut Contract Price \$1 a Barrel, U.S. Oil Executives Say

NEW YORK (Reuters) - British National Oil Corp. is likely to reduce its contract price for North Sea oil by up to \$1 a barrel, perhaps within two weeks, senior U.S. oil industry sources said Tuesday. One said there was room in the market for BNOC to make a cut of up to \$1.50 a barrel.

A major oil company source said BNOC would amounce a \$1-a-barrel cut before Christmas. Other sources said it was not expected before the

However, spot-oil-market traders in Rotterdam disagreed with the U.S. report. Traders said BNOC was likely to defer a final pricing decision until January or later, and may well decide to lose some contract business rather than risk cuts that could trigger a price-cutting war with

In London, a BNOC spokesman said Tuesday that the state owned company was assessing market conditions. He stat talks with customers and suppliers had just started and no price recommendation for the first quarter of 1984 was likely until they were completed.

Michael Unsworth, an analyst with Scott Goff Hancock, said BNOC

had every incentive to delay a decision, as market conditions for the rest of the winter would be clearer in January. He said U.S. oil companies might be trying to lest OPEC's nerve by putting pressure on BNOC.

U.K. Industrial Production Off 0.5%

LONDON (Renters) - British industrial production fell 0.5 percent in October after an upward-revised rise of 0.7 percent in September, provisional Central Statistical Office figures show. The office added, however, that October industrial production was 1.9 percent higher than

Manufacturing output [eil 0.3.percent in October, to stand 1.2 percent above its level of a year earlier, the office said. September manufacturing output rose a revised 0.1 percent.

In the three months through October, industrial output, was about 1 percent higher than in the previous three months and 1.5 percent higher than in the corresponding period last year.

Satellite Contract Reported in Bonn

BONN (Reuters) — A West German consortium has won a contract worth \$15 million Deutsche marks (\$296.36 million) for satellite equipment from Deutsche Bundespost, postal ministry sources said Tuesday. They said the companies involved were Siemens AG; an ITT Corp. subsidiary. Standard Elektrik Lorenz AG; Erno Raumfahrttechnik GmbH, a unit of Messerschmitt-Bölkow-Blohm GmbH, and Ant Nachrichtentechnik GmbH, owned by Robert Bosch GmbH, Maunesmann AG and Allianz Versicherungs-AG.

AG and Allianz Versicherungs-AG.

The Ministry for Post and Telecommunications confirmed later that by 1987 it would build a satellite system.

Gutehoffnungshütte Predicts Loss

OBERHAUSEN, West Germany (Renters) — Gutchoffnungshitte Aktienverein will show a substantial loss in the fiscal year ending June 30, the company's new managing board chairman, Klaus Götte, said Tues-

Mr. Gotte, who was appointed last month, said it was too early to make a more exact forecast. The holding company, whose interests include machine tools, shipbuilding, wires and cables and nonferrous-metal products, had a consolidated group net loss of 83.9 million Deutsche marks (\$30.5 million) last year after a 64.3-million-DM profit the previous year, and cut its dividend to five marks from seven.

Dow Chemical Is Retiring Bonds

MIDLAND, Michigan (AP) — Dow Chemical Co. is retiring about \$100 million in bonds by exchanging them for 1.4 million shares of common stock and about \$37 million in cash.

"The net result is a reduction in our long-term debt. Plus, there's an extraordinary linancial gain to the company," a Dow spokesman, Thayne Hansen, said Monday. He said Dow had made similar transactions in the

Dow said it had filed a registration statement with the Securities and Exchange Commission for the stock issue, to be made through Salomon Brothers Inc., which previously had purchased the bonds. The number of shares and bonds to be exchanged will be determined later, Mr. Hansen

Phibro-Salomon to Self Subsidiaries

Chicago-based Hyatt Corp. to finance the start-up.

NEW YORK (AP) — Phibro-Salomon Inc.'s board has approved the sale of four industrial operations for about \$40 million to an investor group headed by John J. Lee, a Phibro-Salomon executive vice president, and interest in the former Laboushere & Co. to Morgan, which has since then been responsible for the dayand interdec inc., a company based in Richmond Hill, Georgia, and owned by Ghaith R. Pharaon, a Saudi businessman.

David Tendler and John H. Gutfreund, co-channen of Phibro-Salo-

mon, said Monday that the sale, subject to negotiation of definitive agreements and the conclusion of the investor group's financing arrangements, would substantially accomplish the company's objective of dis-pring of operations not directly a part of its primary business of commodities trading and investment banking.

The subsidiaries are Conserv Inc., a fertilizer maker in Florida;

National Zinc Co., a zinc smelter in Oklahoma; Phibro Oil and Gas Corp., a Texas oil-and-gas-exploration company, and Somex Ltd., a vanadium-processing operation that has been inactive for more than a

U.S. Trade Gap With EC Seen

New York Times Service

WASHINGTON - This year, for the first time since 972, the United States will have a deficit in trade with the European Community, a U.S. trade official has told a Senate

The official, David C. Lund, senior Commerce Department economist, said Monday that the deficit would be "easily over \$1 billion," a substantial ieterioration after surpluses of \$3.5 billion in 1982 and \$8.7 billion in 1981.

The gap between the fast growth rate in the United States and the slow rate in Western Europe was "probably the main cause of the deficit," Mr. Lund said. He added that a stronger dollar and a reduction in U.S. farm exports also were factors. Agricultural trade, which accounts for nearly a quarter of U.S. exports to Western Europe, fell to \$7.6 billion in the year ended Sept. 30, from \$8.9 billion a year earlier.

NEW YORK - American Exto increase our market share in a press Co. has announced that its weak market, and it turned out that earnings for 1983 would be 10 perwe priced our products below what cent below the 1982 level because it we really should have. In the last has added \$230 million to the reseveral months, we have seen both serves of the Fireman's Fund Inthe frequency of claims as well as surance Co., its insurance subsid-

earned \$581 million, or \$3.02 a ever seen before." American Express also said Monday that it was replacing Ed-win F. Cutler, 59, who has been

chairman and chief executive of Fireman's Fund since last Jan. 1. Sanford J. Weill, 50, president of

the parent corporation, will take on the added responsibilities of chair-man and chief executive of the troubled subsidiary, while William M. McCormick, 43, who has been president of the corporation's travel-related services company, will head the insurer's U.S. property and casualty operations.

Mr. Cutler, whose entire career

has been at the insurance company, will become chairman of its execu-

Mr. Weill said Monday that

Hong Kong's Recovery Seen as Weak, Tentative

(Continued from Page 11) statistics indicate. In the June-to- about 11 percent, economists say. September period, for instance, exports were up 31 percent, com-pared with the 1982 third quarter. For the first half of the year,

tourist spending was 25 percent ahead of last year. Sustained growth is expected for the rest of 1983 at least. "It's been a very profitable year," observed Kenneth Hayden-Sadler, a spokesman for the Hong Kong Tourist Associa-

Braniff Ponders Stock Offering

DALLAS - Braniff International officials say the airline, due to start flying again March 1, may make a public offering of up to \$40 million in stock before the revival. The airline filed for protection under the bankruptcy laws in May 1982, and has not flown since.

and would operate under a parent company Dalfort Inc., which in turn would be a subsidiary of Hyatt

flation by the end of the year to The cheaper currency makes im-

ported goods more expensive. The dearth of capital investment, if continued, will burt the sector of the economy that makes the greatest contribution to employment manufacturing. Manufacturing and linancial services each account for about 25 percent of Hong Kong's gross domestic product. But 40 percent of total employment

Without capital investment, Hong Kong's key manufacturing industries - garments, electronics and toys - will have a difficult time remaining.

Unfortunately, the hiatus in long-term investment will continue until there is some basic agreement between China and Britain over Hong Kong's future," said Jimmy D. McGregor, director of the Hong Kong Chamber of Commerce.

Morgan Guaranty Holds Negotiations With Amro

Robert Ferguson, Branill's vice
president, said Monday the stock
offering would make at least \$20
million available to the airline, to NEW YORK - Amsterdambe combined with \$70 million from begun talks on the possible pur-Chicago-based Hyatt Corp. to ii- chase by Morgan of the 50-percent

Silicon Valley Engineer **Denies Spying Charges**

By Robert Reinhold

SAN FRANCISCO - In the first step of an elaborate legal dance in a case that has shaken the microelectronics industry in Silicon Valley, an engineer accused of selfing secrets about U.S. weapons to Polish espionage agents has plead

ed not guilty to the charges.

A U.S. grand jury here Friday indicted the engineer, James Durward Harper Jr., 49, on time counts of espionage and tax evasion. His arraignment was Monday. Investigators said he had participated in a scheme through which he received at least \$250,000 from agents of the Polish Intelligence Service for 61 secret and confidential documents on missile research purloined from the employer of his wife, who died June 22. He was arrested Oct. 17 and has been held without bail at-

an undisclosed location. The indictment and arraignment leave many questions unresolved, mainly the fate of what Mr. Harper has called "the big man" in the case, Dr. William Bell Hugle, 58. Dr. Hugle is an engineer prominent in the business and political life of the high-technology region about 50 miles (80 kilometers) south of here that is known as Silicon Valley. According to an affidavit filed Oct. 14 by the FBI, Mr. Harper was introduced to the spies by Dr. Hu-gle, who has not been arrested or

There is speculation that Mr. Harper, who faces up to life in prison, is negotiating with U.S. au-thorities for lemency in return for his cooperation in building a case against Dr. Hugle and others. The name of Dr. Hugle, figured

neither in Monday's proceedings nor in the indictment. But U.S. investigators had said in court documents that Dr. Hugle received one-third of the payments the Poles made to Mr. Harper. After the arraignment, U.S. Dis-

Authorities this week warned that the IRA was planning a pre-Christmas bomb blitz, both in Northern Ireland and in the British

trict Judge Samuel Conti, to whom the case was assigned, set a hearing for Friday at which he is expected to announce a trial date.

The indictment added some detail to the charges previously aired in the affidavit issued when Mr. Harper was arrested. It contended that from May 1979, Mr. Harper conspired to sell American secrets with his wife, Ruby Louise Schuler, a Polish agent, Zdzisław Przychod-zent-another Polish representative in Mexico known only as Jacques:

The documents, it was charged, were made available by his wife who worked at Systems Control. Inc. of Palo Alto, California, which worked under contract to the Defense Department's Ballistic Missile Defense Advanced Technology Center in Huntsville, Alabama.

According to the indictment, Mr. Harper, a power-supply engineer, neet with the Polish agents in Vienna, Warsaw and various Mexican cities and turned over batches of documents on four dates in 1980, 1981 and 1983. . _____

did not commit that crime."

ues, the AFL-CIO and the U.S. Chamber of Commerce, contend that the endowment is no more

The endowment also known as Project Democracy, was cooceived in April by a study group led by William E. Brock, the U.S. trade dates. John B. Anderson and Eu-representative, and the chairmen of gene J. McCarthy, claimed Mon-the Democratic and Republican parties. Under the law, each political party is entitled to \$5 million for its own foundation, the AFL-CIO gets \$14 million and the U.S. Chamber of Commerce gets \$2.5 million. The remaining money goes for operating expenses and grants to other agencies.

This legislation is a grim joke. It is a scam, Mr. Anderson said. They and their friends could have a lovely time at taxpayer expense selling democracy.

To prevent that, Mr. Anderson, Mr. McCarthy and Edward H. Crane, former chairman of the Libertarian Party, quietly filed articles of incorporation last month under the name National Endowment for

Democracy. Their legal documents were filed with the District of Columbia on Nov. 17. several days before the president signed the bill and before the U.S. Information Agency filed its own articles of incorporation to set up the government endowment.

By taking the name, the three hopes to stop distribution of the money or at least tie it up in a court battle. "You can't have more than one with the same name." Mr. Anderson said of the endowment, "and we got there first."

But Stuart Ross, counsel for the overnment-sponsored National Endowment for Democracy, disputes that He said he "reserved" the name with the District of Columbia's assistant superintendent Nov. 7. Thus, he said, his agency has claim to the name.

Messrs. Anderson. McCarthy and Crane are ready to decide the issue in court

Cambodian Opposition To Confer in Beijing

BELIING - Two leaders of a coalition opposing the Vietnamese occupation of Cambodia arrived here Tuesday to confer. They will be met by a third member of the coalition later this week.

Jackson Says Israeli Issue Feared in U.S.

By Eleanor Randolph Los Angeles Times Senne

WASHINGTON — The Demo-cratic presidential hopeful, the Rev. Jesse L. Jackson, who has been criticized by some Jewish leaders for being 100 pro-Arab, has said that U.S. leaders are reluciant to discuss Middle East policy openly and fairly because they fear "being accused of being anti-

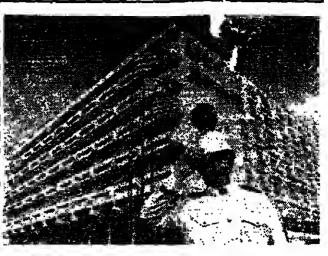

Mr. Jackson, at a breakfast meeting with reporters Monday, said he supports Israel's right to exist with security and within internationally recognized boundaries." But he said he does not support Israeli elaims on the West Bank, and he believes the United States must push for "human rights for Palestinians" and a Palestinian homeland.

"We have a tilt towards Israel," Mr. Jackson said. "And we have an interest in Israel — moral, religious and otherwise. But we need to be able to engage in debate and not be called anti-Semitic."

Last month the Jewish Defense League in New York City called Mr. Jackson "an enemy of the Jewisb people" and threatened to form a group called "Jews Against Jackson" to pressure potential Jewish backers not to contribute to his

Although most other prominent Jewish groups have declined to comment on Mr. Jackson's candidacy, some Jewish leaders have criticized him for past comments and for his support for Yasser Arafat, the leader of the Palestine Liberation Organization.

On another issue, Mr. Jackson. who has threatened not to support the nominee if he were not chosen, said he is "inclined to support the Democratic candidate.

BEING KNOWN AS A NUMBER CAN BE A VERY PERSONAL THING

Look, for example, at the individual registration number on the back label of your bottle of Beefeater Gin. If it were JF 1222146, it would tell you that your Beefeater was distilled Thursday, January 7, 1982, under the supervision of Thomas Bowman, Master Stillman, and that the distillation was approved personally by Mr. Norman Burrough, a direct descendant of our founder, before it was allowed to leave the distillery.

Does it help to know all this? Yes. That number is a vital part of Beefeater's quality control. Because the number is Mr.

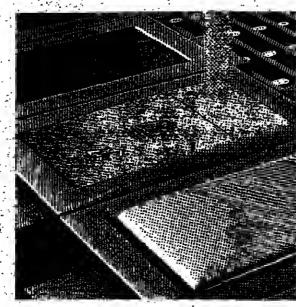

And any artist is at his best

Dissidents Take

Control at GAF

NEW YORK — GAF Corp.'s chairman, Jesse Werner, surrendered control of the chemicals and building-products company Tuesday to Samuel J. Heyman, who led a dissident group of

shareholders to victory in a bitter battle over the

shareholders to victory in a bitter battle over the company's structure.

"I hereby declare the Heyman committee slate duly elected," Mr. Werner said at a session of GAF's stockholders meeting. He said he would do everything to provide "a smooth and orderly transition."

It was the 13th session of the GAF annual meeting, which opened April 28 in Charlotte. North Carolina, but was prolonged during a legal fight over the legitimacy of the vote for directors.

Mr. Heyman's group, which owns about 6.6 percent of GAP's stock, captured 58.3 percent of the votes cast for the board's 10 directors. After Mr. Wetner turned over the podium, Mr. Heyman thanked him for his words of encouragement and said, "We welcome his sup-

The new 10-member board scheduled a meetng for later in the day to elect a new chairman

and chief executive to replace Mr. Werner.

and chief executive to replace Mr. Werner.

After the April 28 meeting, GAF went to federal court in New York to challenge the election results. A federal judge ordered a new election, but last week the 2nd U.S. Circuit Court of Appeals overturned that ruling and said the election results would stand.

The two sides in the proxy fight had disagreed on how to restructure the company, whose chief interests are building materials and

hose chief interests are building materials and

chemicals.

Mr. Werner originally proposed to sell the building materials unit, while Mr. Heyman wanted the chemicals unit to be sold. Mr.

Werner later proposed liquidating GAF, a sug-

The Government of New South Wales is making available a unique site It is proposed that the development be undertaken by private developers, who will meet all development costs and operate the development under long term leasing arrangements. Two major parcels of land are expected to be available for development in 1984, Selected developers will be invited to tender early in 1984 for these parcels. Full development is expected to proceed over several years and to involve the staged release of

additional parcels of the foreshore land. It should be noted that hotel, marina and holiday apartment developments may be possible on these two parcels. in order to establish a tender panel, interested parties are invited to complete a "Registration of

Interest" form. This document is available from: Public Works Department Contracts Room, Floor 18, State Office Block, 74-98 Phillip Street, Sydony, N.S.W. 2000 Australia.

Telephone: (82) 279 4333. Public Works Department District Office 359 High Street, Coffs Harbour, N.S.W. 2450 Australia.

Agent General for New South Wales New South Wales Government Offices 66 Strand, London, WC2N 5LZ

"Registration of Interest" closes at 2pm on 31st January 1984.

New Venezuelan Leader's Big Problem to Be Fall in Oil Income

By James LeMoyne

Nov. York Times Service victory last week, Venezuela's president elect, Jaime Lusinchi, has promised decisive action to relieve a growing economic crisis, with his Action Party. It has been the domifirst priority the regenomation of mant party in Venezuela over the Venezuela's \$34 billion of foreign past 25 years. He has close hes to debt. But even with firm political leadership and a debt restructuring analysts say the nation faces

years of tight living The crucial test, foreign bankers and independent economists say, will be to hold public spending in line with more innited oil income.

Report

Mr. Lusinchi is to take office in February, but he has already ap-pointed a committee, including a former funance minister and central bank chief, to study ways to re-structure the debt. The debt problens involve bringing interest pay-ments up to date at more than 450

foreign banks.
The government imposed currency controls in February, to half it incorred when oil revenues were

> To lessen the dependence on oil, to diversify the economy, encouraging import substitution, tourism

and agriculture. But such plans will to be exhausted after the first half take years to show results. **Bangor Punta Accepts**

Lear Siegler Merger By Agis Salpukas

New York Times Service NEW YORK - Lear Siegler Inc. and an initially reluctant Bangor Punta Corp, have announced a merger agreement under which Lear Siegler is to buy all of Bangor Punta's common shares for \$27.50 each, \$1.50 more than Lear Siegler

offered last week. The agreement, announced Monday, calls for a cash tender offer under which Lear Siegler could start buying tendered shares as early as Jan. 5. Bangor Punta's preferred stock, which is convertthle into common stock at the rate of 2.11 common for each preferred,

will get a proportionate price of \$58.03 a share.

The package values Bangor Pun-ta at \$256 million. Bangor stock was unchanged Tuesday at \$27,125 on the New York Stock Exchange after rising 62.5 cents Monday.

Lear Siegler, a producer of avionics and flight-control systems based in Santa Monica, California, has pursued Bangor Punta since early December.

Bangor Punta produces a variety of items, including law-enforce-ment equipment and recreational products, but its major field is gen-eral aviation aircraft. It makes Pip-Siegler an option to buy up to 1.3 er Aircraft's Cheyenne series of corporate twin-engine propiets and Piper's line of twin- and singleengine piston aircraft.

A severe shroop in the general preferred currently outstanding.

aircraft husiness has depressed Bangor Punta's earnings. The company had a loss of \$64.4 million for the year ended Sept. 30, in contrast to net income of \$3.1 million the

vear before. But Robert T. Campion, president of Lear Siegler, said in a statement: "Bangor represents the right company at the right time for Lear Siegler. We believe our aerospace and defense-contracting experi-ence, plus our financial resources, will allow Bangor's business to accelerate product and market devel-

Lear Siegler earned \$64.1 million in the year to June 30, down from \$72.3 million a year earlier.

Bangor Punts said it would waive its right of first refusal to permit Lear Siegler to buy 1.53 mil-Ferdinand von Galen for \$27 a products." share if he chooses to sell.

Mr. von Galen resigned last month as head of the Frankfurt Stock Exchange after a private bank in which he is a partner, Schröder Münchmeyer, Hengst & Co., required a bailout from other banks because a large block of loans seemed uncollectible,

million shares of authorized but unissued stock at \$27.50 a share. The company has 7,325,467 shares of common and 327,514 shares of

Xerox Agrees to Buy **U.S. Investment Firm**

By Steven J. Marcus

هكذا من الأصل

New York Times Service NEW YORK - Xerox Corp. has announced that it had agreed to acquire Van Kampen Merritt Inc. a privately owned investment banking firm based in Naperville. Illinois, for \$150 million plus a contingent payment, based on Xerox's earnings over the next three years, of up to \$68 million.

The transaction has been approved by the boards of both companies and a definitive agreement has been signed. Monday's announcement said.

Van Kampen Merritt specializes in the packaging of tax-exemps municipal bonds into long-term unit investment trusts. With close to \$7 billion in unit trusts outstanding, it is the United States' third-largest such firm, behind Merrill Lynch, Pierce, Fenner & Smith and John Nuveen & Co.

Van Kampen is the largest packager of insured municipal bond trusts and also underwrites bond issues and trades in bonds. In the year ended Nov. 30, Van Kampen Merritt had net income of \$25 mil-

James R. Lamb Jr., a Xerox spokesman, said the move would "broaden the base" of Xerox's financial services business and provide "a distribution channel to market a wide variety of financial products,"

The firm is attractive to Nerox, he said, because it has very good management, is self-financing, is a profitable and fast-growing business in its own right and will reinforce Xerox's other financial services. These include Xerox Credit Corp., which specializes in the leveraged leasing of large capital equipment, and Crum & Forster, a property and casualty insurer that Xerox acquired in January 1983 for \$1.6 billion.

David T. Kearns, Xerox's president and chief executive officer, said the acquisition showed that the company had decided not to get into the retail securities brokerage business but had instead chosen "to pursue the course of wholesallion common shares controlled by ing innovative packaged financial

said the acquisition was a further indication of Xerox's diversification strategy. The company's attempts to expand into personal computers and noncopier office automation, he said, had been unsuccessful but financial services seemed attractive. Xerox's recent efforts in this area are already adding to the company's per-share

earnings, he added.

Harry Edelson, an analyst with
First Boston Corp., said the action by Xerox represented more than diversification. "Technology eats up cash." he said, and financial-services subsidiaries can be "cash cows" that help support development of new technological products. Other companies, he said, such as Control Data Corp., International Business Machines Corp. and Honeywell Inc., have been pur suing similar strategies.

China, Japan Said to Set Joint Uranium Venture

United Press International BEIJING - China and Japan agreed in high-level talks between nuclear officials from both counties in Beijing last week to launch a joint uranium exploration-andproduction project in China's Yunnan province early next year, a source close to the talks said Tues-

China accepted an offer of Japanese technology needed for mining uranium in the mountainous south ern province. The project would enable China to "develop nuclearpower plants. It also is hoped that some uranium would be exported 10 Japan as a result of the increased production," said the source, who added that no specific quantity or period for emports were set.

J.S. Urges ensure of et Downing light Panel Asked

o Condemn Soviet

By Richard Wirkin

New York Times Service NEW YORK - The United ates, noting that an international quiry had rebuffed a Soviet conntion that the South Korean airter shot down Sept. I was on a y mission, has reportedly called new for a world condemnation of e Soviet Union for destroying the

In addition, according to delestes who heard the appeal Monay, the United States urged the nternational Civil Aviation Orgaization to censure the Russians or allegedly failing to cooperate ith the agency's investigation of

The Korean Air Lines Boeing 47 was on a flight from Anchorge. Alaska, to Seoul when it was it hy at least one of two missiles ired by a Soviet jet fighter as the irliner flew over the Soviet island f Sakhalin. The plane crashed in he Sea of Japan, and all 269 per-ons on board were killed.

The American appeal was made by J. Lynn Helms, head of the Fedral Aviation Administration, at a losed-door session in Montreal of he international aviation organiza-ion's 33-member council, its govrning body.

In earlier deliberations in mid-September, the council limited its censure to "deeply deploring" the destruction of the airliner and directed that the aviation organizaflon conduct an investigation to "determine the facts and technical aspects" of the fatal flight.

The council's reluctance to accede initially to U.S. calls for outright condemnation of Moscow was seen as an effort to avoid any criticism that it was prejudging the inquiry the council set in motion.

But now the council has the contents of the report drafted by the eight members of the inquiry team. The report presents 16 conclusions, many of them simple findings of

In addition to discounting the Soviet contention about a spy mission, the report says there are no indications, despite Soviet assertions that warning shots were fired, that the Korean crew knew they were being pursued by interceptors. It also says there was nothing in the last radio message from the crew about the sudden loss of pressure in their jumbo jet to show that they were "aware of the reason for a rapid decompression."

Prime Minister Yasuhiro Nakasone waved to voters Tuesday on a campaign tour through the streets of Tokyo.

Japan's Electoral System Attacked for Inequalities

By Clyde Haberman New York Times Service

TOKYO - No matter what happens in Japan's national elections next Sunday, the odds are good that the courts will eventually declare the results unconstitutional.

Several weeks ago, Japan's Supreme Court ruled that procedures used in the last general election in 1980 contained inequalities violating the nation's constitution. But since the judges did nothing to put teeth into their decision, the situauon persists. Similar rulings have come and gone, to no avail, for a

Now, with a campaign under way for the 511 seats in the lower house of the Diet, or parliament, Japanese voters are being reminded once again that some are more equal than others. Prime Minister Yasuhiro Nakasone pledged last week to change the system but cynicism runs high.

Usually it is the rural voter who benefits, at the expense of the city dweller. For example, a member of the lower house from Hyogo pre-82.015 eligible voters, while a colleague from Chiha, outside Tokyo, represents 359,492. It means that

In the worst-case example immediately following a 1975 redistrictfecture in central Japan represents ing, one rural constituency had 2.92 times the voting strength of an urban district in parliament's lower house. By the 1930 election, the worst-case ratio had crept up to 3.95-to-1, and now it is 4.3-to-1. The situation is even worse in the

dent of El Salvador's constituent

cials on the decision to deny entry to Mr. Borge and Mr. d'Aubuisson. Defenders of the government's action argue that the denial of such visas is an important instrument of foreign policy and that the govern-ment has broad rights to determine

who can enter the United States. Opponents argue that a refusal to grant visas on political grounds enies Americans access to information that might contradict a given administration's position. They also argue that such denials are istent with the country's tradition of civil liberties and tarnish the United States' image abroad.

Under Section 212 (a) 27 of the Immigration and Nationality Act, and undemocratic," the newspaper the government can exclude foreigners "whose activities would be editorial. Few disagree, hut nothing contrary to the public interest."

Section 212 (a) 28 of the act permits the government to exclude oreigners who are members of Communist or anarchist organizations, as well as those who are not members but "write, publish, circulate, display or distribute any written or printed matter advocating or teaching opposition to all organized government" or "advocating and teaching the economic, international and government doctrines

The law, known as the McCarran-Walter Act, was enacted in 1952 and includes many other grounds on which the government can keep foreigners out of the country, whether they want to live in the United States or simply visit it. It has frequently been invoked to exclude not only foreign government officials but also artists, writers and opposition politicians,

Arych Neier, a law professor at chairman of the Fund for Free Expression, an organization that tries to promote free speech around the world, opposes any exclusion of foreigners on ideological grounds. But he said "the courts have always differentiated between what one may do to Americans inside the country and what one may do to outsiders who want to come in."

Most of those who argue that the government should be able to keep t in reserve for certain cases.

Elliott Abrams, the assistant secretary of state for human rights and humanitarian affairs, said: "My own view is that there are definitely

might send the wrong message by letting someone in; for example, by letting in a political figure who had violated human rights.

delicate situation in managing our relations with Nicaragua and in the Contadora project and we might want to send some kind of diplomatic signal by keeping Borge out," he added

Juliana Pilon, a policy analyst at the Heritage Foundation, a conservative research institute in Washington, said she believed the power to deny visas should be used "very. very seldom," but that the power nonetheless constituted "a form of political warfare or diplomatic

Arthur Helton, director of the political asylum project for the Lawyers' Committee for International Human Rights, another group that lobbies for freedom of expression, said he and most other opponents of exclusion on political grounds could support keeping would-be visitors or immigrants believe that someone may engage grading, the spectacle of the United States being afraid of these peoin terrorist activities."

But the existing law, he said, con- ple," he said. tains provisions that "sweep far too

Representative Barney Frank, Democrat of Massachusetts, has introduced a bill to repeal many of the provisions of the McCarran-Walter Act that give the government a broad basis on which to

"The assumption should be that anybody can come here to visit unless they are going to be violent, going to overthrow the government, are terrorists, have an infectious disease, are ex-Nazis or are so mentally ill that they might cause problems because they are out of control," Mr. Frank said.

He said that refusing visas on political grounds damaged the

The existing provisions allowing the government to deny visas on political grounds have survived previous legal tests.

in 1972, for example, the Supreme Court upheld the decision to deny entry to a Belgian Marxist scholar and journalist who had been invited to speak before academic and other groups.

Mr. Helton said he expected new egal challenges to the McCarran-Walter Act's exclusion provisions. possibly involving the cases of Mr. Borge and Mr. d'Aubuisson.

Meanwhile, there appears to be no overwhelming sentiment in Congress to repeal or modify the

Nicaraguan Says Rebels **Shift Tactics**

By Doyle McManus Los Angeles Times Service

WASHINGTON — The leader of Nicaragua's largest U.S.-backed rebel group says that his guerrillas have shifted strategy to open the option of seizing a "liberated zone," setting up a provisional gov-

"To declare a liberated zone and establish a provisional government remains an option," Adolfo Calero Portocarrera, president of the Nicaguan Democratic Force, said Monday in an interview. "It would impose a decision, a new attitude, on the Nicaraguan people and on

Mr. Calero, who claims to have 9.000 men hased on Nicaragua's northern border with Honduras, said that his guerrilla force had shifted its focus from hit-and-run raids against strategic targets such as seaports and oil facilities toward more extensive military presence in northern Nicaragua, to make the option of a "liberated zone" more

Members of Mr. Calero's group, hich receives much of its financing from the U.S. Central Intelligence Agency, have long talked of declaring a government of their own in Nueva Segovia and Jinotega departments, where their presence is greatest.

But recently, some have described a more detailed scenario: If the current peace negotiations between Nicaragua and other Central American nations break down, the rebels might seize a major town, declare themselves the legitimate rament of Nicaragua and apeal for help from Honduras and the United States.

Mr. Calero, a former industrial-ist and leader of Nicaragua's Conservative Party, who was in Washington on an unofficial mission to drum up support for his cause, re-

Government analysts from the United States and some other from clear that the rebels are capadangers of ahuse, but there are at hie of the type of operation being

Contadora Plan for Central America Is Described as Being Nearly Finished The document was widely intermits itself to a withdrawal of Cu-

By Juan M. Vasquez

MEXICO CITY — The foreign ministers of four Latin American countries are ready to put the finishing touches on a document that could pave the way for a peaceful settlement of Central America's conflicts, according to regional dipomatic sources.

The document is said to encomass economic, political and military arrangements among the five principal Central American nations in a legal framework that addresses most of their mutual con-

The proposal for a regional settlement is expected to be a major topic of discussion between Mexican government officials and members of the U.S. presidential commission on Central America, who arrived in Mexico Monday.

The commission, headed by the former secretary of state, Henry A. Kissinger, will hold private meet-ings with President Mignel de la Madrid and Bernardo Sepulveda, the foreign minister, as well as with other leading Mexican figures.

Mexico is one of the four countries of the so-called Contadora group, which has sponsored the peace initiative for Central America. The other members are Venezu-ela, Panama and Colombia.

ment -or set of documents - that would implement an earlier agreeprepared last September, was called a "document of objectives" in which the Central American na- dential commission on Central tions agreed to work toward lessening regional tensions. It was accepted by the foreign ministers of Nicaragua, El Salvador, Houduras, Guatemala and Costa Rica.

actions, the "document of objec-

The objectives include the elimination of arms trafficking in the region, a ban on foreign military bases and advisers and an end to support for terrorism, subversion and sabotage.

preted as being aimed at Nicaragua and its support for leftist revolutions and at El Salvador and Honduras, where U.S. troops are training or helping government forces.

Mexico believes that the pres-

ence of American troops in Central America poses the threat of wider conflict in the region. Nicaragua, the biggest military force in the region, charges that the United States is preparing to invade it. "I do not believe this should be seen as some sort of treaty that

res a global agreement, one Latin American official of the document, "but there are certain ngs that can be done now, and that's what we want everybody to

The official cited recent concilia-tory overtures by Nicaragua as a step toward a possible signing of the Contadora document. They included the easing of internal political restraints and the announced departure of Salvadoran rebel leaders from Nicaragua. Nicaragua is said to have de-

manded that U.S. military trainers in Honduras and El Salvador be withdrawn before Nicaragua com- held in Panama.

ban military advisers from its own soil. The Reagan administration would be unlikely to agree to such a step, diplomats here believe, be-cause it would undermine government forces in El Salvador.

by demands for the "democratization" of Nicaragna, meaning the lifting of all political restraints inside the country. The leftist leadership of the country holds that such questions are internal matters of influence.

The peace plans are said to be ready for approval by Mr. Sepul-yeda and Lis counterparts from but it is unclear when they will meet next. A session planned for Dec. 21 in Panama has been put off until early January, according to Mexican officials.

Under that schedule, the Containe the document before circulating it to the foreign ministers of the Central American countries. If the latter approve, a subsequent meeting and signing ceremony would be

Kissinger Panel Reports work said that representatives from the four countries had spent the last few months writing a docu-Generally, the sources said, some Democratic members felt that Mr.

By Hedrick Smith New York Times Service

WASHINGTON - Henry A. Kissinger, chairman of the presi-. Democrats on the panel who favor making new U.S. aid to El Salvador conditional on an end to rightist death squad violence, commission

Although it does not obligate any country to undertake specific actions the "document of object her document of ob actions, the "document of objectives" was seen by the sponsoring recommendations had been draft-nations as a major step forward ed, the group was expected to propose a large new aid program for Central America in its report to President Ronald Reagan next

> Other commission officials said Monday the aid package could to-tal several billion dollars over a five- to 10-year period. These offi-cials, speaking on condition that they not be identified, said that several Democrats on the 12-mem-U.S. aid to El Salvador should be linked to an end to death squad

> But they said that the former secretary of state, among others, had argued against this, asserting that since El Salvador was of vital interest to Washington, aid should not be made conditional.

> Commission officials also revealed that differences had developed within the bipartisan group whether the administration should be given leeway to use more military measures and pressures to achieve U.S. objectives in the re-"live with" the Marxist-led government of Nicaragua.

The principal opposition to Mr. Kissinger was reported to be from Robert S. Strauss, former Democratic Party national chairman; Henry Cisneros, mayor of San Antonio; Carlos F. Diaz-Alejandro, a Cuban-born economics professor at Yale University, and, Lane Kirk-land, president of the AFL-CIO.

Kissinger was trying to push the group to adopt a report that would endorse the administration's policies toward Central America, Neither Mr. Hetu nor commission members would comment on the group's internal deliberations.

East, West Reach Accord: Sack the Coach

LONDON - Those who despair of East ever seeing eye to eye with West should know there is one Soviet reaction in exact accord with OUT DWD:

When their sportsmen fail, the coach is invariably sacked. A morsel of comfort, no doubt, for the millions unnerved at the breakdown of disarmament talks and at seeing "The Day After." Yet it does show that we and they share. in a winner-takes-all sporting

world, a common response. In its last 33 soccer internationals, the Soviet Union has been beaten twice. The loss to Brazil in the 1982 World Cup (a miscarriage of justice in Seville) caused the resignation of a splendid manager, Konstantin Beskov. The defeat in Por-nigal last month now brings the resignation of his successor, Valery Lobanovski.:

The pattern goes further back, to when Beskov replaced Nikita Si-monyan; always one month after failure, a month in which the allpowerful sports committee reaches for the inevitable scapegoal. Lobanovski, 46, apparently asked to be released from his

duties "for family reasons." Beskov, it was said, had felt his time was up and that he should give way to a younger man. Comforting, isn't it, to hear the Russians trot out the same euphe-

mistic hogwash for depriving a man of his living?

"That's what we need now," said

Riley, whose team is leading the Pacific Division — by a half-game

over Portland - but is playing

replaced by Marai Gramov, who now accepts Lobanovski's "resig-

Still, it is all rather more humane than in days gone by. Beskov was able to return to his duties in rebuilding Moscow Spartak, and doubtless Lobanovski will find a niche. Despite caustic criticisms of both from inside the Communis Party and out, things are oot as tough as in 1976 when, following a calamitous experiment of transferring gifted players to Dynamo Kiev and using that side as the national team, the manager was suspended from all duties. His oame? Valery Lobanovski, the very same.

Where Russian soccer policy is a minority of one is in its retention of star players behind closed borders. You may recall Oleg Blokhin, the most successful goal-scorer in Soviet history, being promised his re-lease during the last World Cup. It became a hollow inducement.

Blokhin is 31, and his hopes of joining other Eastern bloc players earning small fortunes in the West The manager's incompetence have evaporated. Were he allowed (if this is really the case)," wrote out tomorrow, it would be too late one Soviet observer, "should be to capitalize on what once were the

> Conversely, the mass release of internationals from Yugoslavia is among the eight qualifiers for oext year's European championships. Aside from France, the host, Belgium, Denmark, Portugal, Roma-ois and West Germany are

The Netherlands is almost certain to annihilate Malta and join them this weekend.

Which leaves one place, and that could be settled in Cardiff on Wednesday night when Yugoslavia plays Wales, In a way, exiles from both nations hold the key.

scottand are eliminated, and Wales equally vital to them was similarly tried, naively it seems, to ask the denied. English for fair play - either release the handful of players preparing for their country's most crucial rives late after club duty) are the match in 25 years or postpone the only two of Yugoslavia's 57 players league games, as would surely have in exile to be invited to do their best happened were England still in contention.

No chance. Treading sour grapes, the English snubbed Wales again, just as the FA has this year in calling off the century-old home international championship on

The only thing Wales can do is use the rhetoric of the spurned to afresh now that he so clearly re- knock out Yugoslavia. "We are playing," says the ironically named Welsh manager, Mike England. "for our survival." Without the likely to determine the final place minimum £100.000 (\$143,000) Wales anticipates that qualifying is worth, its coffers are bone dry. Yet in Ian Rush. Wales has per-

haps the most valuable goal-scorer in Europe, Unlike most Welshman he speaks little, but on the field, as he has proved time and time again for Liverpool, he has blinding acceleration and a nose for the halfchance that make him virtually impossible to contain over 90 minutes. All he needs is service.

The man most likely to surpass oth nations hold the key.

The Welsh are relieved to be at once his nation is assured that he, The Welsh are relieved to be at full strength despite the wretched refusal by English League clubs to unburden their neighbor of the risk unburden their neighbor of the risk employee of Anderlecht in Belgium, and his release to join the Viscolavians training for a match Peruzovic and Paris St.-Germain

striker Safet Susic (who again arfor the homeland: such has been the devastating effect of jealousies whenever highly paid mercenaries are recalled to the cause.

Overseas claims, and national service, deprive Yugoslavia of the wealth of technically polished talents it constantly produces. But occasionally the export trade pays invisible dividends.

A certain Dzemal Hadziabdic, who enjoyed four successful and emotional years as a fullback with the rise of Swansea City in Wales, has been called to assist Yugoslavia. Not as a player, for that is oow beyond a man who runs a wine bar back home, but as "technical adviser" — or, as he impishly puts it, "chief spy."

The man Wales adopted as Jimmy (easier to roll off the Welsh tongue) is in the camp because of his intimate knowledge of Wales. He may need introducing, however. to the team his own country fields. for Coach Todor Veselinovic has called upon no fewer than 31 players over the past half dozen games. Opposites the Welsh and Yugo-

slavs certainly are. Mike England probably couldn't find, never mind select. 31 players in one year; his relative success has been in the compactness of his squad. Exactly a year ago in Titograd the teams drew, 4-4. Wednesday, it

is all or nothing: The winner qualifies. Another draw? That would leave Yugoslavia needing to beat the ultra-defensive Bulgarians at ome next week to go through. It is as tight as a sporting situa-

tion can be, but the sheer hunger of the Welsh may triumph over the possibly more fluent skills of their

While Joey Jones, the Chelsea left back, is anything but the most gifted touch player on the field, he articulates the position immacu-lately: "This will be my 57th cap. and ever since I've played for Wales we've qualified for nothing. It may sound tidiculous, hut we'll die for Wales. We really will."

Stenerud Sets All-Time Field Goal Mark

Jan Stenerud, who earlier had set an all-time National Football League field goal record, kicked a 23-yarder 5:07 into overtime to give Green Bay a 12-9 victory over Tampa Bay Mooday night in Tampa, Florida. The Norwegian-born kicker passed George Blanda's NFL mark of 335 on his second field goal of the night, a 32-yarder (above) in the third quarter, and forced the overtime on a 23-yard effort with 28 seconds left to play in regulation, "Believe it or oot, I was pervous," said Stenerud, 40, of his game-winner. "That's the first time in long time." Green Bay needs a victory against the Bears in Chicago Sunday to stay in playoff contention.

I'd worked for, I wasn't going to give it up that easily." U.S. Beats Selects. Leads Series, 2-1

United Press International RICHFIELD, Ohio — Pat La-Fontaine and Scott Bjugstad each scored two goals to lead Team USA to a 4-2 victory over the Soviet Select team here Monday night. The victory gave the U.S. Olympic squad a 2-1 lead in the hockey

scries. The crowd of 16,711 was the largest ever to see a hockey game in Ohio and the biggest to see the Olympic squad in its 48 games leading up to the Winter games in Sarajevo, Yugoslavia in February. The Selects are one of three teams from which the Soviet Olympic squad will be drawn.

The Americans jumped to a 3-0 lead in the first period on a goal by LaFontaine and two goals, including a breakaway, by bjugstad 2:27 apart. The Russians answered with goals by Vladimir Kovin and Vla-dimir Golikev 14 seconds apart early in the second period. But La-Fontaine took a pass from David A. Jensen, skated down center ice ahead of the Soviet defenders and faked out Soviet goalie Aleksandr Tyzhnykh to score on a 10-footer at 5:54 of the period.

BOOKS

IN AFGHANISTAN An American Odyssey

By Jere Van Dyk. 253 pp. \$18.95. Coward-McCann, 200 Madison Avenue, New York, N.Y. 10016.

Reviewed by Drew Middleron

F OR most of us, an accurate appraisal of what is going oo in Afghanistan is impossible. On one hand we have the reports of insurgent groups funneled through their representatives in Pakistan. On the other, we have the complacent reports from Moscow of the Soviet forces' operations, always, of course, successful.

The first must be taken with many grains of sait since, as the historian Phillip Guedella once pointed out, the reports of refugees are generally unreliable. The second are largely propaganda. But what we should know by now is that Afghanistan is not the Soviet Vietnam many Americans foresaw when the Russians invaded the country late in 1979.

Van Dyk's book, parts of which appeared in The New York Times, is a welcome corrective. He got into Afghanistan, suffered physical hardship, saw some action and emerged to write this fascinating narrative. It is fascinating because the author gives us a

clear and, on the whole, unbiased picture of the men who are fighting the Russians and of the society that bred them. He did not see a great deal of military action; less, I should say, than a war correspondent in World War II saw in the course of a day.

But what he did see is reported with clarity, lucidity and those occasional burnan insights that bring a war, no matter bow distant, home

He also draws attention to the fact that the West and sympathetic Moslem nations have failed to provide the Afghan insurgents with the weapons they need. This is particularly true of the SA-7, a low-level, heat-seeking, surfaceto-air missile that the insurgents desperately need if they are to hold off the Soviet helicopters that are the most powerful and ubiquitous force in the Russian arsenal.

War is a dirty business, but nowhere worse than when the resources of an advanced industrial country are targeted on a largely primitive people. The author went from village to village and saw and admired their spirit under the lash of war. As a stranger, he was given food and lodging. As an American he was subjected to what must have been an intolerable amount of boasting, which appears in most cases to be

Van Dyk's book also illummates another weakness of the Afghan insurgency. By his estimate there are six political groupings en-gaged in the resistance —all with headquarters and high-powered propaganda organizations io Peshawar, Pakistan.

Zaman Durrani, a tribal leader in Pakistan talked of "the human condition" of the Alghans. "Afghanistan is a tribal society with very complicated rules," he said. "These rules, laws go back centuries. The West cannot pass judgment on us." "The six political powers in Peshawar have no laws with which to rule; they have only guns and money. You cannot buy the soul of an Afghan with these."

Political comments such as these are an important aspect of the book. But the truly entrancing parts are Van Dyk's descriptions of what his journey was like.

He is a descriptive writer of quality. From the pages come the smell of campfires often fed by camel dung, the pride and the poverty of the people, the taste of sweet tea and chunks of

mutton fat, the textore of an unknown people. The desert, encountered on his return from the great Soviet airport-fortress at Kandahan had the impact on him that it does on most Westerners when it is first encountered. Like T.E. Lawrence and others before him, he marveled at the loneliness, the sense of identity with the infinite that the desert gives.

But in the end, the book's greatest value is the picture it gives of the Afghan people. Primitive they are, but like the peasants of Russia and China they have sought and found a true nobility in the crucible of war.

If the book has a lesson, it is that unless the West is prepared to provide the arms that the insurgents need, the Russians will win in the sense that Afghanistan will be another Czechoslovakia or, perhaps, a Soviet Socialist Republic incorporated into the Russian empire. The toughness, resiliency and dedication of the insurgents, so admirably depicted in this book, are the only hope for a different outcome.

Drew Middleton is on the staff of The New York Times.
